

## Monthly Air Pollution Control Program Summary Report

### Regional Office Concerns Received or Investigated

#### Between March 16, 2026, and April 15, 2026

#### Concern Types Received During Report Period

|                                        | Total |
|----------------------------------------|-------|
| <b>Total</b>                           | 169   |
| <b>Agricultural Anhydrous Ammonia</b>  | 0     |
| <b>Asbestos</b>                        | 10    |
| <b>Fugitive Particulate Matter</b>     | 13    |
| <b>Hazardous Air Pollutant Release</b> | 3     |
| <b>Odor</b>                            | 64    |
| <b>Open Burning</b>                    | 42    |
| <b>Other</b>                           | 33    |
| <b>Particulates</b>                    | 4     |

Number of Referral Notices of Violation (RNOV) Issued: 0

Number of Notices of Violation (NOV) Issued: 0

Number of Letters of Warning (LOW) Issued: 3

Number of Letters of Unsatisfactory Findings (UF) Issued: 7

#### Concerns Investigated During Report Period

|                                               | Total |
|-----------------------------------------------|-------|
| <b>Total</b>                                  | 169   |
| <b>Concerns Received Before Report Period</b> | 6     |
| <b>Concerns Received During Report Period</b> | 163   |

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern; therefore, the totals listed here may not reflect the total number of concerns received during the reporting period.

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

## Monthly Air Pollution Control Program Detail Report

### Regional Office Concerns Received or Investigated

#### Between March 16, 2026, and April 15, 2026

| Concern No. | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County          | Region | Inspector Initials | Final Action       |
|-------------|---------------|--------------------|---------------------------------|-----------------|----------------------|--------|--------------------|--------------------|

**Concerned Party:** Emma Perkins

**Concern Info:** Via Webform email - Submitted at 8:52 am Tuesday, March 10, 2026 - Date of Incident or First Noticed: 03/01/2026

Smells like metal and hot when the wind blows from the direction of Stahls into my neighborhood. I have always heard people talk about how it smells strongly of metal in the neighborhood to the North of Stahls but recently moved there and immediately notice the smell. It was especially strong this morning (March 10th) likely due to the direct wind direction from Stahls to my home. [sic]

**Conclusions:** While an odor was detected during the investigation, it was only detected at a 2:1 dilution and did not constitute a violation of the odor regulation. No violations were observed during the investigation.

**Concerned Party:** Daisy Reaves

**Concern Info:** Via Webform email - Submitted at 12:51 pm Wednesday, March 11, 2026 - Date of Incident or First Noticed: 10/20/2025

I own a property at 300 bluff st Cleveland mo 64734  
My neighbor has a small hog farm (20 hogs)  
Their pens run down hill to our small creek.  
The pens never get cleaned and leaves the pigs standing in about 1ft of mud feces when it rains.  
The smell is almost unbearable.  
Our kids like to play in the creek but I worry about e coli with the unsanitary conditions the hogs are kept in. [sic]

**Conclusions:** At the time of the investigation I did not observe any deposits of solid waste entering the stream or in the stream. At the time of the investigation I did not observe any animal remains in the stream.

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County         | Region | Inspector Initials | Final Action       |

| 65351                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 03/12/2026    | 03/18/2026         | Advanced Metals                 | Open Dumps      | Lamar /Barton       | SWRO   | JR                 | Phone Conversation |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> There is an illegal dump site in the area of interstate 49 and the Bellamy Missouri exit. Due to previous threats either by or allowed by the company, the owner and/or current employees my information on this site is limited. The same trash material(shredder scrap) that is at both locations in Lamar was being taken and dumped in a field in the area of I49/ Bellamy exit. The material consists of plastic, trash, glass, carpet, insulation, tires, rubber, and extra fine dust of all the materials ground up along with oversize material that wasnt processed. Dumping was happening around November of 2025. I can estimate anywhere from 30 to possibly up to 100 semi truck loads were dumped here. [sic]</p> <p><b>Conclusions:</b> CON-1900</p> <p>MoDNR's enforcement staff will be made aware of the site visit. No changes at the property were observed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |               |                    |                                 |                 |                     |        |                    |                    |
| 65397                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 03/16/2026    | 03/16/2026         | Allison Eads                    | Other           | Gladstone /Clay     | KCRO   | MC                 | Email              |
| <p><b>Concerned Party:</b> Shane Proctor</p> <p><b>Concern Info:</b> Via Webform email - Submitted at 1:26 pm Saturday, March 14, 2026</p> <p>Neighbor's outdoor boiler furnace is producing smoke constantly and bothering neighbors. This has been a constant problem for a few years since it was installed during each winters months. We and several others have contacted Gladstone code violations but so far has been ineffective in investing the concern. The smoke is excessive at times and causes breathing distress inside our home. Other neighbors have complained also. Even today while the weather is relatively nice, the smokestack is constantly putting out a small amount of smoke and being blown in our direction causing any outdoor activities to be irritating and stressful. We were trying to do some yardwork today and all we could think of was the irritating smoke entering our lungs. It is ours and others belief that this device (outdoor wood burning boiler furnace) should not be allowed in regular neighborhoods due to the excessive amounts of pollution they produce. I'm sure as the weather gets warmer it will eventually be shut off for the season so time is of the essence. Thank you. [sic]</p> <p><b>Conclusions:</b> Described concern is unregulated by the department. The department is prohibited by the State legislature from regulating the manufacture, performance, or use of residential wood burning heaters or appliances. (RSMo 643.055). Any restrictions would need to be promulgated and enforced by local officials (e.g. county or city governments).</p> |               |                    |                                 |                 |                     |        |                    |                    |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Caller states a strong sent of chlorine on W Poplar Street has been identified. Is strongest around midway when the weather is nice. The area is surrounded by multiple business, so unsure where the smell is coming from, but many businesses in the area. Maaco Autobody shop recently had a fire, but the smell was observed to occur before and after. Caller has tried contacting multiple sources to figure out the source of the odor including Recycling Center, sewage, and city utilities services. [sic]</p> <p><b>Conclusions:</b> CON-1913</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |                    |                                 |                 |                     |        |                    |                    |

| <p><b>Concerned Party:</b> Jonathan Bas</p> <p><b>Concern Info:</b> From Web: Unreal smell this evening, this is a horrible smell that is unexplainable, I am not exaggerating at all, I have friends and family over during the Summer I can't imagine when it gets hot what the stink will be [sic]</p> <p><b>Conclusions:</b> CON-1918</p> <p>During the investigation I observed two 7:1 detections of odor from the facility spaced fifteen minutes apart and in less than an hour. This is a violation of 10 CSR 10-6.165, and the facility is issued a Letter of Warning, which requires the facility to submit documentation relating to its plan to reduce odors from its compost piles.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |               |                    |                                 |                 |                     |        |                    |                    |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Received Date | Investigation Date | Suspected Source Owner/Operator  | Concern Type(s)                                         | City/County       | Region | Inspector Initials | Final Action |

| <p><b>Concerned Party:</b> Delma LaFiore</p> <p><b>Concern Info:</b> I am writing to report active and ongoing environmental violations at the property adjacent to my southern border. Despite a previous site visit by DNR staff these problems were not addressed and continue. The operator continues to maintain multiple industrial-scale gravel stockpiles in a manner that violates Missouri state law.1. Fugitive Dust Violation (10 CSR 10-6.170):<br/>The operator is maintaining at least one massive gravel stockpile, and three other stockpiles, the massive one looks to be exceeding 30 feet in height. None of these piles are tarped or covered. As they dry, they emit significant quantities of particulate matter. Under 10 CSR 10-6.170, no person shall allow fugitive dust to go beyond the premises of origin. I am requesting that the Director require immediate "reasonable control measures," specifically the permanent covering or tarping of all stockpiles to prevent air pollution on my property. These tarps should not be thrown across the top of the gravel stockpiles and flap up in the wind but should cover the gravel from top to bottom and be tightly fastened.2. Lack of Secondary Containment (Berミング):<br/>The operator has failed to install proper height berms sufficient to keep this from toppling, or containment around the entire "ground silo" or the additional exterior piles. Consequently, every rain event causes silt-laden runoff to enter the stream channel and my property, one pile is next to the stream that runs into the Pomme De Terre river and during significant rains enters my ponds violating the Missouri Clean Water Law. Per PUB0185, all fines and oversized material must be placed in a manner that prevents silty material from entering the stream. 3. Commercial Scale Identification:<br/>While the landowner ( DNR did not dispute )in the site summary has categorized this as a small operation, the physical dimensions of the primary pile (30'H x 38'W x 163'L) alone calculate to approximately 4,800 tons, which is more than double the threshold for a small-quantity exemption. I request a formal inspection by Air Pollution and Water Protection staff, rather than Land Reclamation, to ensure these public health and environmental standards are enforced. Notice of Regulatory Negligence<br/>"Finally, be advised that while DNR staff has conducted a site visit and did not ask to access my section of the river , they have failed to cite clear [sic]</p> <p><b>Conclusions:</b> CON-1922</p> <p>I did not observe any violations during this investigation. No action is required.</p> |               |                    |                                  |                                                         |                   |        |                    |              |

| <p><b>Concerned Party:</b> Ashley</p> <p><b>Concern Info:</b> Since the addition to the RV park was completed a putrid smell of sewage that intensifies with rain, heat, humidity. There appears to be sewage dumped and runoff carried by the rain into the Grand river. I have spoken to the city several times to no avail. I keep getting told it has always been like that and it's normal. I've lived in Archie since 2009, prior to the RV park being built and I know for a fact there was never an odor.<br/>Alleged Violator's Latitude/Longitude: 38.486124 / -94.342909<br/>Alleged Violator's FRS ID: 110056412626 [sic]</p> <p><b>Conclusions:</b> No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission were observed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                  |                                                         |                   |        |                    |              |

| <p><b>Concerned Party:</b> Joseph Neal</p> <p><b>Concern Info:</b> Spoke with concerned property and he stated that the City of Conway Public Works has a site next door to him that they use for junk, scrap metal, scrap asphalt, asbestos, oil (he believes they pour it out on the ground and use container again), etc. He is concerned that it will effect his well water. He has voiced his concerns with the city previously. They have an easement between properties and they state he has to have his own driveway, but he states he researched it and no he doesn't. The site for the city is a wooded area with a road on the easement. They have placed a cattle gate up and locked it. Please call concerned party and they will give you access on their side of the property to view dump site. [sic]</p> <p><b>Conclusions:</b> CON-1955</p> <p>Asphaltic concrete is considered clean-fill. Storage of materials for reuse is allowed. The amounts of other waste materials observed at the site do not warrant a violation. Information regarding proper disposal of materials will be provided to Scott for future reference.</p> <p>Any disagreements regarding fence lines and access to property is between the property owners and not within the jurisdiction of the Department of Natural Resources.</p> |               |                    |                                           |                                                  |                 |        |                    |                    |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s)                              | City/County            | Region | Inspector Initials | Final Action       |

| <p><b>Concerned Party:</b> Matthew Newman</p> <p><b>Concern Info:</b> FROM EPA COMPLAINT FORM:<br/>"Continued illegal dumping of waste for a composting business that is creating hazardous, putrid odor that is traveling in a 3 mile radius affecting numerous residences and multiple businesses. Runoff from property is traveling directly into Coon Creek, which has the endangered hellbender." [sic]</p> <p><b>Conclusions:</b> CON-1978<br/>During the investigation I observed two 7:1 detections of odor from the facility spaced fifteen minutes apart and in less than an hour. This is a violation of 10 CSR 10-6.165, and the facility is issued a Letter of Warning, which requires the facility to submit documentation relating to its plan to reduce odors from its compost piles.</p> |               |                    |                                 |                                              |                        |        |                    |                    |
| 65469                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 03/19/2026    | 03/30/2026         | Keith and Debra Lutton          | Open Burning                                 | South Greenfield /Dade | SWRO   | BS                 | Phone Conversation |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Called was following up on Concern-1839 (also associated with CON-1691). Caller stated that the responsible party is still burning things like insulation from wires, and appliances they bring in from off site. Caller states they drive by daily and have noticed active open burning and black smoke rising from the property. Caller states that if a red truck is parked next to the trailer then the responsible party is likely home. [sic]</p> <p><b>Conclusions:</b> CON-1984<br/>No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the previous site investigation. No further action is required. Lutton has received a fact sheet in regard to the regulations.</p>                           |               |                    |                                 |                                              |                        |        |                    |                    |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Received Date | Investigation Date | Suspected Source Owner/Operator                | Concern Type(s)          | City/County   | Region | Inspector Initials | Final Action |

| 65477                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 03/18/2026    | 03/19/2026         | Kenneth & Marilyn Goodwyn Trust                | Open Burning             | Edina /Knox   | NERO   | DB                 | Site Visit   |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Caller reports that the Kenneth &amp; Marilyn Goodwyn trust owns a homestead that is being torn down and burned west of Edina just south of 6 and Democrat Fill Rd. Stated that this morning a brush pile and a shed were burned and that the hog barns have brush piled on the floor over the lagoons ready to burn. Hog barns are wood with 2x4 wood flooring. Stated the house was burned two years ago. [sic]</p> <p><b>Conclusions:</b> No violation of the open burning rule was found during the investigation. At site, found burning brush piles with tin and untreated native boards and posts. Some fence wire also in burn piles. Tires separated out and not burned. Observed dumpster full of demolition waste. Lagoons and hog barns did not have brush on them. Spoke with KD Bohon (son-in-law of owner), who was doing the demolition and burning at the site. He stated he was mostly burning brush piles and also a building that was made with hedge post frame and sheet metal. He pointed out the dumpster at the north side of the property and said he was putting the other demolition waste into dumpsters and was currently waiting on the landfill to provide additional dumpsters and haul off the full one. He stated he was working with USDA to mitigate the lagoons, which had been unused for 30+ years and he planned to land apply if they passed testing and close them out properly. I asked to look through the site and he gave permission. I observed the structures, waste piles, and burn piles and noted the burn piles contained untreated wood, brush, and metals, but no prohibited materials that I could see.</p>                                                                                                                                          |               |                    |                                                |                          |               |        |                    |              |
| 65478                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 03/19/2026    | 03/19/2026         | Scott Bryant / KD Bohon                        | Open Burning             | Edina /Knox   | NERO   | DB                 | Site Visit   |
| <p><b>Concerned Party:</b> Brennon Bunch</p> <p><b>Concern Info:</b> Caller reports that Scott Bryant has burned 2 hog confinement buildings, 2 cattle sheds, a house, and a red hay shed on his Mother-in-Law's property. Caller stated that Knox County Sheriff's Deputy Travis, was at the property earlier this week and informed Scott Bryant that the structures could not be burned. Caller stated that despite the instructions, Scott Bryant burned the structures anyway. Caller is also worried about 2 lagoons on the property that the caller believes are not being properly drained. [sic]</p> <p><b>Conclusions:</b> No violation of the open burning rule was found during the investigation. At site, found burning brush piles with tin and untreated native boards and posts. Some fence wire also in burn piles. Tires separated out and not burned. Observed dumpster full of demolition waste. Lagoons and hog barns did not have brush on them. | <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Concern via email: "Off hwy 13 at lake Meadows RV and mobile home park . Location north dumpster come in b road. They have muiple health hazardous items in there open burn pile beds couches plastic chemical buckets mixed in with wood dump oil and more. There a near by water source also leads to stocked pond and or lagoon for human waste . Drainage is clogged up. When they burn it puts black smoke in air and more. The smell of pile is terrible. They add more daily oil paint dump on ground. They burn all of it causes multiple issues. Pile is currently getting more dangerous they burn all the items plus toxic chemicals that dumped there daily soaking in ground. Some one needs to please handle this before they burn this again. The smoke covers park hwy 13 toward Humansville.they also have used camper toilets in pile paint cans and more. Hopefully someone can please stop this. Clogged drainage. Lagoon smell is terrible. " [sic]</p> <p><b>Conclusions:</b> CON-1997</p> <p>No new violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. Current UF in progress at site.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |               |                    |                                                |                          |               |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> From email:</p> <p>"70 ozark loop Conway, mo is piling up plastic garbage bags and burning them. The smell is making It difficult to be outside and have our windows open. Is it possible to ask them to get a trash can or go to the dump and stop burning? It's making it difficult on us. We have to be able to enjoy our home without headaches and nausea from plastic burning so often. Thanks" [sic]</p> <p><b>Conclusions:</b> CON-2013</p> <p>No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the perimeter site investigation. Refused property access. A letter has been sent in order to attempt to make contact.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |               |                    |                                                                     |                                                |                      |        |                    |                          |

| <p><b>Concerned Party:</b> Kayla Frank</p> <p><b>Concern Info:</b> Via Webform email - Submitted at 5:37 pm Saturday, March 21, 2026 - Date of Incident or First Noticed: 03/19/2026</p> <p>Warrensburg, MO school - Martin Warren Elementary has high levels of radon detected inside the school and they are still requiring staff and students to attend. Several teachers and students report having headaches and at this time, no mitigation system has been put in at this time. The school board seems to be dragging their feet addressing this issue and forcing attendance under these conditions while they developed a seems wrong. There are several pregnant women in this school working in high levels of radon. My children's doctors have advised my children not attend school under its all resolved and levels are retested. Currently one of my children have been facing medical concerns for a while and now has a heart condition, she started this school 2 years ago healthy as a horse.<br/>High concerns have been addressed in the past but they had janitors just air out the basement of the school to lower the levels but nothing more. If this is a situation a member of DNR can please follow up with and ensure levels in the school are safe after a proper system is installed, the community is desperate to have outside help oversee it gets done properly. | <p><b>Concerned Party:</b> Tami Kovac</p> <p><b>Concern Info:</b> Caller says that Charlie Owens is burning on his property again. They say that it they can't go outside, and it smells like smoke in their house, and their eyes burn. People are dumping their trees and brush on his property, and he is burning a huge amount. Caller believes the people are paying him to dump there. He is always burning at night time or overnight.</p> <p>Caller says Charlie Owens got out of prison in June, and did some burning about 3 months ago, and started consistently burning a lot for at least a month. Caller confirmed Charlie Owens is living on the property in a camper trailer. Caller said there are frequently multiple people up there. [sic]</p> <p><b>Conclusions:</b> Charlie Owens stated he had burned off grass on the property, which had got out of hand and burned other materials on the property. Owens said he was not burning tree trimming waste on the property, and no evidence of current burning of tree trimming waste was observed. A compliance assistance letter will be sent to Owens restating the restrictions on trade waste burning and providing clarification on what waste materials may and may not be burned.</p> |               |                    |                                   |                             |                      |        |                    |                    |

| <p><b>Concerned Party:</b> Vincent</p> <p><b>Concern Info:</b> The Moores own Jessa James tree service and bring in tree debris and burn in a open pit. They leave it un attended for hours. Large pile trees from outside of property is piled up on south side of property. [sic]</p> <p><b>Conclusions:</b> The owner, Larry Moore, appeared to be following the open burning criteria when using an air curtain for trade waste. The additional burn pile on the northern border was from personal land clearing activities of the property, which the owner did himself. The land clearing piles were burned on site. No violations were found during the investigation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                   |                             |                      |        |                    |                    |

| <p><b>Concerned Party:</b> Catalina marquez</p> <p><b>Concern Info:</b> From Webform email- New Request for Assistance 76926 Environmental Concern; Request for Assistance; Submitted at 5:29 pm Wednesday, March 25, 2026.<br/>My insurance company wants to cancel my insurance because they find out my property has abestos. I have kids in the house and I'm worried.</p> <p>Additional concerns received 3/25/26 at 6:04 am and 3/26/26 at 11:32, 2:17 [sic]</p> <p><b>Conclusions:</b> I looked at online records and found this is a single-family house located within the city of Kansas City. The department has no regulations applicable to this concern. General information was provided, and I recommended obtaining the services of a registered abatement contractor if asbestos needed to be disturbed. Information on the concern was also forwarded to the Kansas City Health Department.</p>                                                                                                                                                                                                                                                                                                                                                                                              |               |                    |                                 |                                               |                      |        |                    |                       |

| <p><b>Concerned Party:</b> Larissa</p> <p><b>Concern Info:</b> Caller states that 80 acre farm next to her house has been spreading materials since yesterday afternoon, including overnight, onto the field. The odor is very strong even inside the house. The material that is being spread is a dust, and this dust has covered their vehicles. The caller says that she is familiar with typical manure smells and this is something different. Caller says that she has been told from multiple neighbors that the material is coming from Midwest Organic Solutions [sic]</p> <p><b>Conclusions:</b> CON-2091</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |               |                    |                                 |                                               |                      |        |                    |                       |

| <p><b>Concerned Party:</b> Tim Sizemore</p> <p><b>Concern Info:</b> Caller stated that a home on the corner of Park and Oak in Brashear is being torn down and hauled off. Caller also stated that the home looks to be a 100 year old house likely to contain asbestos and lead and wanted to make sure it was being disposed of properly. Caller also stated it was a fast turn around to be going to a landfill and that they believed the home had recently sold at the courthouse steps for back taxes.</p> <p>3/23/2026 - Concerned Party (CP) contacted the department to inform that the house had been fully demolished, pushed into a hole on the property, and burned over the weekend. According to the CP, the local fire department, sheriff's office, and highway patrol responded to the fire; after which the remains of the house were covered with soil. The CP stated that despite being covered, the waste is still smoldering.</p> <p>(CON-2021) [sic]</p> <p><b>Conclusions:</b> Based upon observations and information obtained during the investigation, it was determined that Clarence C. Miller Jr. is in noncompliance with the Missouri Solid Waste Management Law and Regulations and the Missouri Air Conservation Commission Regulations.</p> <p>UFRR issued on 4/8/2026.</p> |               |                    |                                 |                                               |                      |        |                    |                       |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County        | Region | Inspector Initials | Final Action |

| <p><b>Concerned Party:</b> Brittany Harris</p> <p><b>Concern Info:</b> 'm a resident of St. Louis County and am hoping you can help clarify a concern I've observed over time. Could you please let me know which agency or office is responsible for monitoring air quality and atmospheric conditions in St. Louis County? I would also appreciate guidance on who can provide detailed explanations about visible aircraft condensation trails and related atmospheric activity. On multiple occasions, I've noticed clear morning skies becoming increasingly hazy by midday, accompanied by aircraft flying in patterned paths and leaving lingering trails. I understand that commercial air traffic and atmospheric conditions can produce contrails, but I would value a more detailed explanation of what factors might contribute to the patterns and duration I'm observing. If possible, could you also point me to any local data, reports, or experts who can explain:</p> <ul style="list-style-type: none"> <li>• How air quality and atmospheric conditions are monitored locally</li> <li>• What types of aircraft activity are common over St. Louis County</li> <li>• How persistent condensation trails form and under what conditions</li> </ul> <p>I'm asking in good faith as a concerned resident who would like to better understand what I'm seeing and ensure there are no impacts to public health or the environment. Thank you for your time and for any information you can provide or direct me to.</p> <p>Thanks,<br/>Brittany</p> <p>As a follow up email, the CP states: Hello- I'm following up on my message. My morning walk reminded me, as I watched blue skies in St. Louis county get sprayed once again. These are not commercial planes, they are flying in a distinct pattern and created clouds. I would like to have answers to my questions below.</p> <p>Thanks,<br/>Brittany [sic]</p> <p><b>Conclusions:</b> DNR does not have regulatory authority over mobile sources emissions. I responded to the concerned party via email.</p> |               |                    |                                 |                 |                    |        |                    |              |
| 65552                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 03/23/2026    | 03/24/2026         | Unknown                         | Other           | /St. Louis         | SLRO   | RA                 |              |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We received an anonymous chemtrails concern from the DNR website. The CP states: Pollutant, chemical trails that for hours do not dissipate from planes flying in odd directions like straight up and cross-crossing in the sky. Driving Directions I often see them over Chesterfield Valley and when driven near the Baxter/Clarkson Roads intersection. [sic]</p> <p><b>Conclusions:</b> DNR does not have authority over mobile source emissions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |                    |                                 |                 |                    |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We received an anonymous open burning concern from the DNR website. The CP states: A neighbor has burned trash in there yard occasionally and looks like they are about to burn another pile. Driving Directions Head west on Hwy 100, turn left on Old Iron Rd, property will be on right about 2 miles down the road. [sic]</p> <p><b>Conclusions:</b> We did not observe a violation of the open burning rule at the time of the investigation. I am sending an open burning fact sheet to the source address, and the Solid Waste Unit will follow up on the concern.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |               |                    |                                 |                 |                    |        |                    |              |

| 65556                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 03/19/2026    | 03/19/2026         | Metal Recyclers                           | Opacity<br>Odor                | /St. Louis City        | SLRO   | CW                 |                       |
| <p><b>Concerned Party:</b> Aaron Cadman</p> <p><b>Concern Info:</b> Aaron Cadman from the St. Louis County APCP called our office to call in a concern. He was driving along I-70 in north St. Louis and noticed a chemical burning odor and a haze in the air. He believed it was coming from one of the metal recyclers in the area. [sic]</p> <p><b>Conclusions:</b> I was unable to definitively pinpoint the cause of the haze and odor, but it was likely due to a startup or malfunction event at Advantage Metal Recycling at 5 North Market Street. By the time I arrived, the facility was operating within regulatory standards for visible emissions and no odor was present in the area.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |               |                    |                                           |                                |                        |        |                    |                       |

| <p><b>Concerned Party:</b> Casey Smith</p> <p><b>Concern Info:</b> Via Webform email - Inquiry/Question - Submitted at 9:46 am Friday, March 27, 2026</p> <p>We just saw an article on the news that said that Liberty is building a mega AI data center. I am concerned about environmental issues, health hazards, air, pollution, noise, pollution, and water issues on top of energy. What can we do to make sure that we are protected in that environmental cleanliness is in place as much as possible? I want to make sure clean environmental laws and zoning are followed if it has to happen. [sic]</p> <p><b>Conclusions:</b> Emailed response to concerned party. Although the department does not have statutory authority to regulate data centers specifically, we do implement and enforce statutes and rules that regulate activities that may impact air, water, and soil. The configuration and operational needs of a facility may need one or more permits regarding air quality, water protection or resource, or waste management from the department.</p> <p>Without fully knowing the scope of the facility referenced in the inquiry, the department cannot provide a definitive answer on their specific needs or requirements. Additionally, there may be local and county codes and regulations that may impact the initial approval of the project. Our website can provide updates on any permits that may be applied for, pending, and/or approved related to the project through our department. The link to the website is: <a href="https://dnr.mo.gov/">https://dnr.mo.gov/</a>.</p> |               |                    |                                           |                                |                        |        |                    |                       |

| <p><b>Concerned Party:</b> Donna McCord</p> <p><b>Concern Info:</b> Concerned Party reports that today there are visible clouds of dust of what she believes to be coming from the quarry. States that there is a sticky, tacky substance on their lawn that her toy show dogs are getting into. Very concerned about wildlife that is breathing this dust. [sic]</p> <p><b>Conclusions:</b> At the time of the investigation, no fugitive dust was observed to be leaving the property boundaries. The quarry was also watering the haul roads. No violation could be observed during this site visit.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |                    |                                           |                                |                        |        |                    |                       |

| <p><b>Concerned Party:</b> Risa Olds</p> <p><b>Concern Info:</b> A voicemail was left on 3/24/26 stating that the smell of burning chemicals was back in Oak Grove. On 3/25/26, I called the concerned party back to get additional details. She said some neighbors had also noticed the smell, but it seemed to be local to around her neighborhood because her daughter who lived a few blocks away had not noticed it. She said the smell was not present the day I called her (3/25/26). [sic]</p> <p><b>Conclusions:</b> No odors were observed during the investigation. The source of the odors remains unknown.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |               |                    |                                           |                                |                        |        |                    |                       |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Received Date | Investigation Date | Suspected Source Owner/Operator               | Concern Type(s)                                    | City/County               | Region | Inspector Initials | Final Action |

| <p><b>Concerned Party:</b> Casey Smith</p> <p><b>Concern Info:</b> Via Webform email - Inquiry/Question - Submitted at 9:46 am Friday, March 27, 2026</p> <p>We just saw an article on the news that said that Liberty is building a mega AI data center. I am concerned about environmental issues, health hazards, air, pollution, noise, pollution, and water issues on top of energy. What can we do to make sure that we are protected in that environmental cleanliness is in place as much as possible? I want to make sure clean environmental laws and zoning are followed if it has to happen. [sic]</p> <p><b>Conclusions:</b> Emailed follow response to concerned party:</p> <p>Greetings Casey Smith,</p> <p>Thank you for your inquiry submission to our department's concern webpage! We understand your concerns and are grateful for your desire to ensure processes are followed to ensure environmental quality. Although the Department of Natural Resources does not have statutory authority to regulate data centers specifically, we do implement and enforce statutes and rules that regulate activities that may impact air, water, and soil. The configuration and operational needs of a facility may need one or more permits regarding air quality, water protection or resource, or waste management from the department.</p> <p>Without fully knowing the scope of the facility you are referencing in your inquiry; I cannot provide a definitive answer on their specific needs or requirements. Additionally, there may be local and county codes and regulations that may impact the initial approval of the project. Our website can provide updates on any permits that may be applied for, pending, and/or approved related to the project through our department . The link to the website is: <a href="https://dnr.mo.gov/">https://dnr.mo.gov/</a>.</p> <p>Again, thank you for your inquiry and feel free to contact us if you have more questions as the project potentially advances,</p> <p>Mike</p> |               |                    |                                               |                                                    |                           |        |                    |              |
| 65569                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 03/27/2026    | 04/02/2026         | Nebius/NorthPoint Development                 | Land Disturbance<br>Fugitive<br>Particulate Matter | Independence /Jackson     | KCRO   | MG                 | Email        |
| <p><b>Concerned Party:</b> Monica Engle</p> <p><b>Concern Info:</b> The CP observed land disturbance activities associated with the agricultural field east of Bly Road and 78 Highway which the CP indicated it was part of the Nebius Data Center work. It is approximately 400 acres with activities starting in November 2025. The CP said they removed the topsoil to change the zoning from agricultural. The CP did not identify any BMP for storm water control. The CP also identified that the high winds yesterday 3/26 caused dust plumes leaving the property. [sic]</p> <p><b>Conclusions:</b> MG WPC Conclusion: No further action. The site has the appropriate land disturbance permit and has BMPs in place to prevent sediment loss. No violations of the Missouri Clean Water Law were observed.</p> <p>CK-During my investigation of dust leaving the property boundaries at the Nebius data center construction site while Haupt Construction was performing excavation work, I was unable to confirm dust leaving the property boundaries. Because it had rained the previous night, the dust issues had decreased from the previous few days. Representatives for Haupt Construction and ARCO Construction were contacted and provided the Fugitive Dust regulations for any future dust issues and they both indicated an understanding of their responsibilities on maintaining dust control over the data center construction site.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                               |                                                    |                           |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We received an anonymous contrail concern from the DNR webpage. The CP states: Why do I wake up to what is supposed to be clear skies and see planes leaving massive streaks across the sky just for those same streaks to spread out and linger all day long blocking the sun and the sky? Con trails disappear and evaporate, its sickening to think that our state allows this to happen. Why is this allowed? How is this legal? Why isn't there a public petition sent to every residential area to vote that air pollution be made illegal? Why dont you care?<br/>Driving Directions<br/>Its the whole f**king state just look up. [sic]</p> <p><b>Conclusions:</b> The Missouri DNR does not have the authority over mobile source emission. The EPA and potentially the FAA would have jurisdiction over airplane emissions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |               |                    |                                               |                                                    |                           |        |                    |              |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Received Date | Investigation Date | Suspected Source Owner/Operator                       | Concern Type(s)                    | City/County                     | Region | Inspector Initials | Final Action          |

| <p><b>Concerned Party:</b> Craig Goldrich</p> <p><b>Concern Info:</b> Caller states that sewer odors by the hotels along Hammons Blvd are picking up in severity again. The caller works at the Joplin RV dealership and said that the odors seem to be returning to levels similar to those observed in May 2025 (see ace61630 and/or LOW sent to City of Joplin on May 22, 2025). While the city has made efforts to minimize sewage odors, the caller is concerned that the odors are coming back. [sic]</p> <p><b>Conclusions:</b> CON-2129</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                |               |                    |                                                       |                                    |                                 |        |                    |                       |
| 65579                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 03/25/2026    | 03/26/2026         | Unknown developer                                     | Hazardous Air<br>Pollutant Release | Webster<br>Groves<br>/St. Louis | SLRO   | DB                 |                       |
| <p><b>Concerned Party:</b> Pat Fitzgerald</p> <p><b>Concern Info:</b> Neighbor behind CP had house demolished and she is concerned when they scraped off the stucco before demolition that the lead in the paint has contaminated the area. Bellon Wrecking was the contractor. CP stated that the crew did not wear any PPE and or do anything to try to mitigate the release of lead during the process. They have cleaned up the larger debris, but the smaller particles of debris travelled in to neighboring yards, exposing children and animals to lead and tracking it into their homes. She is contacting St Louis County air program to handle the air portion of the concern. [sic]</p> <p><b>Conclusions:</b> This concern was referred to St. Louis County Air Pollution Program. The waste generated has been disposed at a solid waste landfill. According to the demolition contractor, the paint was not scraped from the structure. The contractor used generator knowledge to determine that the demolition waste was non-hazardous.</p> |               |                    |                                                       |                                    |                                 |        |                    |                       |
| 65582                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 03/18/2026    | 03/19/2026         | Timberoc / Alicia Muhm                                | Open Dumps<br>Open Burning         | Marthasville<br>/Franklin       | SLRO   | AA                 |                       |
| <p><b>Concerned Party:</b> Sean Johnson Co: Warren Co Emergency Co</p> <p><b>Concern Info:</b> The caller stated that a property owner had demolished a part of their own residence and intended to burn the construction waste. The caller notified the responsible party (RP) that they were not allowed to burn the waste. The RP then began preparations for burial of the solid waste on their property. This incident is being referred to the department's St. Louis Regional Office for further investigation. [sic]</p> <p><b>Conclusions:</b> Nothing was burned or illegally disposed of when I got there. All wastes were properly cleaned up.</p>                                                                                                                                                                                                                                                                                                                                                                                               |               |                    |                                                       |                                    |                                 |        |                    |                       |

| <p><b>Concerned Party:</b> Heather Haase</p> <p><b>Concern Info:</b> Report states "•The air quality is really bad due to increased traffic on the road. Dust coats shrubbery and vehicles. It's causing health issues, especially for someone who has COPD, and makes it difficult to spend time outside. This only recently became an issue due to a new business that recently moved in (approx. Mid-Feb), causing the amount of traffic greatly increase.<br/>           •The new business is an animal auction house, meaning many large trucks with livestock are kicking up the gravel/dust. During events the informant estimates that approximate 1500 vehicles use the road. This increased traffic starts a few days prior to each auction and auctions are likely to occur almost every weekend. The informant talked to the business owner, but since the trucks are not owned by the business they indicated there wasn't anything they could do.<br/>           •This used to be a state-maintained road, but when the county took over it became a gravel road. When the county was approached, the informant was told that the local residents could pay for the road to be sprayed but it was not affordable. The local residents have petitioned the county to at least reduce the speed limit, in an attempt to reduce the dust, but were told it would take at least two hearings. Meanwhile, the air quality continues to be impacted. What can be done to help control the dust?" [sic]</p> <p><b>Conclusions:</b> No violation alleged - public gravel roads are not regulated for traffic dust. I called the complainant and discussed. She said she believes the clean air act requires dust control for roads. I informed her that I did not have any regulations that require that and the EPA did not seem to either. She said she thought a lawsuit against the county should be her next step. I informed her that policy decisions are done through the Air Conservation Commission, who are having their next meeting April 30. I also provided the APCP main phone number.</p> |               |                    |                                 |                             |                   |        |                    |                    |

| <p><b>Concerned Party:</b> Michael Farmer</p> <p><b>Concern Info:</b> From EPA - In a gravel parking lot between two buildings with businesses in them there is a city sewer main holding tank that has been left open. The hole only has a 4 x 8 sheet of metal over it and is not sealed so it stinks a lot because it is an open pit of raw sewage. It has been open for a month and no one has been working there for 3 week. The owner of the building adjacent to it gave the informant the number of the EPA to call about it. This informant, who working in the building on the other side of the open pit of raw sewage, would like to know what is going on and why they left this open with no work being done for 3 weeks. [sic]</p> <p><b>Conclusions:</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |               |                    |                                 |                             |                   |        |                    |                    |
| 65598                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 03/30/2026    | 03/30/2026         | Unknown                         | Open Burning                | Moberly /Randolph | NERO   | DB                 | Email              |
| <p><b>Concerned Party:</b> spiffymind13@gmail.com</p> <p><b>Concern Info:</b> "For years Moberly PD, FD and City Hall have ignored and refused to address smoke from an open burning bothering me and disturbing my comfort and quiet enjoyment of my home. There's a few different citizens who burn but there's specifically one who burns for hours and hours and that smoke drifts right to my apartment and we have Wall units which heat and cool our homes. I'm a cancer patient and have complained about the smoke to the point they have charged me with misusing 911 for reporting the smoke bothering me. I have emails and online reports showing they are refusing to address this. It happens at night and goes on for hours. This is a open fire in someone's back yard not someone's wood heater inside their home." [sic]</p> <p><b>Conclusions:</b> No violation alleged and no location given. Emailed complainant back stating that household trash, yard waste, cooking, and recreational fires are permitted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |               |                    |                                 |                             |                   |        |                    |                    |

| <p><b>Concerned Party:</b> Gideon Buchanan</p> <p><b>Concern Info:</b> Concerned Party stated that there was a horrible smell emanating from Midwest Organics around noon today. He said the winds were out of the N, NE. He lives approximately 1 3/4 miles to the north of west of the facility. I told him we did have an investigator there earlier that morning and threshold odors were not detected during the visit. I told him we would try and visit the site when similar weather conditions presented. [sic]</p> <p><b>Conclusions:</b> CON-2141</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |               |                    |                                 |                 |                    |        |                    |                    |

| <p><b>Concerned Party:</b> Erick Amezcua</p> <p><b>Concern Info:</b> Email forwarded from APCP Receptionist - Mon 3/30/2026 2:42 PM - Subject: Constituent Concern: Lack of Weather Modification Oversight in Missouri</p> <p>Dear Members of the Missouri Air Conservation Commission,</p> <p>My name is Erick Amezcua, and I am a landowner and small-scale farmer in Clinton County, north of Kansas City. I am writing to express concern about the absence of any regulatory framework in Missouri governing weather modification activities, including cloud seeding.</p> <p>As you may be aware, at least nine U.S. states currently operate active cloud seeding programs, including neighboring states. Cloud seeding — the practice of dispersing silver iodide and other chemical agents into the atmosphere to alter precipitation — has been documented by NOAA, practiced since the 1940s, and is reported under the federal Weather Modification Reporting Act of 1972. This is not speculative. It is an established, funded, and expanding practice across the country.</p> <p>Missouri itself has a history of weather modification experiments dating back to the 1960s. Yet today, the state has no active oversight mechanism, no disclosure requirements, and no formal position from the MACC on atmospheric chemical dispersal related to weather modification. Meanwhile, Missouri legislators have recognized this gap: Senate Bill 15, House Bill 2388 (the "Clear Skies Act"), and House Bill 2656 (the "Clean Skies Act") have all been introduced in the current and recent legislative sessions to address weather modification and geoengineering activities in the state.</p> <p>As someone who depends on predictable weather patterns for agricultural planning and who is responsible for the health of my family, my livestock, and my land, I have a direct stake in what is being introduced into the atmosphere above my property. I regularly observe extensive, persistent aircraft trails over Clinton County that behave differently from ordinary condensation trails — lingering for hours and spreading into wide cloud-like formations. I am not claiming to know exactly what these are. What I am saying is that I currently have no way to find out, and neither does any other Missouri citizen, because no state-level monitoring, disclosure, or inquiry mechanism exists.</p> <p>Thank you for your time and attention to this matter. I am happy to attend a future commission meeting to discuss this further and can be reached at the contact information below. [sic]</p> <p><b>Conclusions:</b> The concern is related to policy and was addressed to the Air Conservation Commission; therefore, the Air Pollution Control Program will respond to the inquiry.</p> |               |                    |                                 |                 |                    |        |                    |                    |
| 65609                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 03/30/2026    | 04/03/2026         | John Christian                  | Open Burning    | Pittsburg /Hickory | SWRO   | JW                 | Site Visit         |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP stated that a resident is in the scrapping business, and what they don't sell they pile at their home and burn. They are burning tires, tv's, mattresses, metal, etc. They stated that they burn within six feet of the neighboring property and also near the community well house. CP stated that they burn approximately every four weeks. The CP was also concerned about possible contamination of the well water. I let them know that they could contact the Hickory County Health Dept to have the water tested. [sic]</p> <p><b>Conclusions:</b> CON-2173</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |               |                    |                                 |                 |                    |        |                    |                    |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s)         | City/County         | Region | Inspector Initials | Final Action       |

| <p><b>Concerned Party:</b> Heather Hill, City Clerk</p> <p><b>Concern Info:</b> From Webform email - New Request for Assistance 77266 - Submitted at 9:13 am Tuesday, March 31, 2026.</p> <p>I am writing to request assistance and approval regarding an ongoing littering and illegal dumping issue at the northbound on-ramp in Urich, Missouri.</p> <p>This location has become a frequent stopping point for truck drivers, resulting in a significant accumulation of trash, including bags of waste and bottles containing human waste. The situation has worsened to the point where the area emits a strong odor of urine and poses both environmental and public health concerns.</p> <p>Recently, a local resident voluntarily collected approximately 10–15 bags of trash from this area, highlighting both the severity of the issue and the community’s concern.</p> <p>We have been in contact with the Missouri Department of Transportation (MoDOT), who advised that in order to install a “No Littering/Dumping” sign at this location, a letter of approval or support from the Department of Natural Resources is required.</p> <p>We respectfully request that the Department of Natural Resources provide the necessary authorization or documentation to allow MoDOT to proceed with installing appropriate signage. We believe this will help deter further illegal dumping and protect the surrounding environment.</p> <p>Please let us know if any additional information, documentation, or site details are needed to process this request.</p> <p>Thank you for your time and consideration. [sic]</p> <p><b>Conclusions:</b> Not a function of the regional office.</p> |               |                    |                                 |                         |                     |        |                    |                    |
| 65636                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 03/31/2026    | 04/02/2026         | Larry Wald                      | Odor                    | Carterville /Jasper | SWRO   | JW                 | Phone Conversation |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> The smell is atrocious today!!! Please help us... you are literally our only hope. If you're not dealing with this every day, I'm sure it's easy to consider it no big deal, but we are miserable. And if we could just stay inside, or even go inside when it's so strong it makes you feel physically ill... at least that would give us a break... but we can't! When the smell is outside, it is inside just as bad! And the worst part... sometimes it stays inside our building longer than it stays outside! It takes hours for us to get it out. What would you suggest?? Our new UPS driver came in today... He immediately said, "What is that awful smell?!!!"</p> <p>The really sad part... when you issued them a notice, the smell suddenly decreased 80%-90%. So, they know how to control it and yet they are CHOOSING NOT TO!</p> <p>PLEASE DO SOMETHING - 5TH STREET IN CARTERVILLE MO - JUST FOLLOW THE SMELL. WHEN YU THINK IT'S UNBEARABLE, KEEP COMING BECAUSE I PROMISE IT GETS WORSE. [sic]</p> <p><b>Conclusions:</b> CON-2192</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                 |                         |                     |        |                    |                    |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> The CP called because their neighbor, John Christian, is burning the excess junk on their property. Christian has started storing junk and salvage material on their property and will burn whatever they can't sell/get rid of. This morning, they started burning a pile which contained computers, TV's, tires, and more according to the CP. The fire created a thick black smoke, so the CP called the fire department. Christian had put the fire out before the fire department arrived. The CP is worried about the potential air pollution and excess junk on the property. [sic]</p> <p><b>Conclusions:</b> CON-2190</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |               |                    |                                 |                         |                     |        |                    |                    |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Caller states that there is a massive fire with a black smoke plume behind the W-Bar-Y Fence Co business off of Hwy 13. The business is just north of the Polk County line. The call came in at 9:00 a.m. [sic]</p> <p><b>Conclusions:</b> CON-2209<br/>During the investigation I observed evidence of illegal open burning of trade wastes and treated wood on the facility property. This is a violation of 10 CSR 10-6.045, and the owner is required to properly dispose of the remaining waste to a landfill.</p> <p>The receptionist for the business emailed the department photos and receipts of proof of proper disposal of the observed illegal solid waste on April 22, 2026. A CSU letter will be sent to the facility to notify them that they have returned to compliance. No further action is required.</p> |               |                    |                                      |                               |                     |        |                    |                                     |

| <p><b>Concerned Party:</b> Kelli Wheeler</p> <p><b>Concern Info:</b> I would like to report a concern regarding air emissions from a wood manufacturing facility operating a wood kiln near a residential area.</p> <p>The facility located at 3211 Rains Rd, Jane, MO 64856 is emitting dark, thick smoke that appears heavy and persistent, which may indicate improper combustion or a potential violation of air quality standards. The smoke regularly drifts into nearby residential areas and is noticeable both visually and by odor. [sic]</p> <p><b>Conclusions:</b> CON-2201<br/>No violations observed during investigation. No further actions required. Another concern placed and is being investigated.</p>                                                                                                                                                                    |               |                    |                                      |                               |                     |        |                    |                                     |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Received Date | Investigation Date | Suspected Source Owner/Operator            | Concern Type(s)             | City/County         | Region | Inspector Initials | Final Action       |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Someone or a group is pumping out septic and grease and dumping it and it smells bad. Caller did business at PAR and the smell is inside, bad enough he almost vomited, but did not think it was coming from PAR. He stated the winds were coming from the south. Caller was not sure where dumping is happening as he has not seen any dumping, but believes that is what is happening from talking to employees at PAR and what it smells like. Caller also noted PAR is located across the street from where 'we' (potentially MoDNR or EPA) are remediating contaminated land from mining by removing contaminated topsoil and replacing it with new topsoil. It is unclear if the caller believes the dumping is happening at the remediation location or nearby or if the remediation location was completely unrelated. [sic]</p> <p><b>Conclusions:</b> CON-2215</p> <p>I did not observe any violations during this investigation. No action is required.</p> |               |                    |                                            |                             |                     |        |                    |                    |

| <p><b>Concerned Party:</b> Doug Probert</p> <p><b>Concern Info:</b> Caller reports odors at 7:15 a.m. on April 1st. The winds were out of the NNE at the time, but they shifted to S later in the afternoon after storms rolled in. [sic]</p> <p><b>Conclusions:</b> CON-2219</p> <p>During the investigation I observed two 7:1 detections of odor spaced at least 15 minutes apart and in less than one hour. This is a violation of 10 CSR 10-6.165, so the facility will be issued another Letter of Warning. This LOW will not require a response since a previous LOW issued to the facility on March 27, 2026 set a due date of April 23, 2026 to resolve the required action. The required action was then resolved on April 6, 2026. A Compliance Status Update was issued on April 15, 2026, to announce that the facility resolved the required action listed in the March 27, 2026, LOW.</p>                                                                                                                                |               |                    |                                            |                             |                     |        |                    |                    |
| 65647                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 03/25/2026    | 03/27/2026         | AA Quarry                                  | Fugitive Particulate Matter | Kingsville /Johnson | KCRO   | CK                 | Phone Conversation |
| <p><b>Concerned Party:</b> Nelson Christensen</p> <p><b>Concern Info:</b> Concerned part sent a text with two pictures of the wooded area behind his home showing dust. The text that came with the picture states, " This dust cloud just rolled down my hill. [sic]</p> <p><b>Conclusions:</b> At the time of the dust investigation, there had been rainfall the previous day and no fugitive dust was observed to be leaving the property boundaries. Facility was also watering the haul roads. No violation could be observed during this site visit.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |               |                    |                                            |                             |                     |        |                    |                    |
| 65648                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 04/01/2026    | 04/03/2026         | Adam Wormington                            | Odor                        | Monett /Lawrence    | SWRO   | JW                 | Phone Conversation |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Caller states that Double O Organics released excessive odor at 8pm on Monday night. The caller alleged that most of the odors came from the facility grinding chicken carcasses deriving from George's Inc. at the time of the concern. [sic]</p> <p><b>Conclusions:</b> CON-2218</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |               |                    |                                            |                             |                     |        |                    |                    |

| <p><b>Concerned Party:</b> Rick Strus</p> <p><b>Concern Info:</b> We received an open burning concern from the EPA. The CP states: They are burning huge old chicken houses full of insulation contaminated lumber and possibly other hazardous. The smoke is traveling miles from the burn site causing our eyes and throat to hurt. I live at least two miles west of the site and the smoke is so heavy it looks like the fields are on fire. They are doing this so they don't have to pay to have it hauled to a landfill. This is ongoing for the last few weeks. I didn't know the source for the fire until today. Please investigate to see if this is hazardous to our health. Rose Acres Farm is a nation wide, multi million dollar company. [sic]</p> <p><b>Conclusions:</b> No open burning occurring at facility as of 26MAR2026</p>                                                                                                                                                                                     |               |                    |                                            |                             |                     |        |                    |                    |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s)             | City/County            | Region | Inspector Initials | Final Action |

| <p><b>Concerned Party:</b> Whitney Lammert</p> <p><b>Concern Info:</b> My name is Whitney Lammert, and I am a Herculaneum resident who refuses to stay silent while families in this community are being harmed by decisions that never should have been approved in their current form. I am writing as an advocate for the people who live here — the homeowners, the parents, the retirees, and the families who invested their savings and their futures into neighborhoods that were promised peace, safety, and stability. What stands today at Exit 178 is not simply a gas station. It is a 24 hour regional truck hub operating without the most basic protections for the people who live directly beside it.</p> <p>This letter is not based on speculation. It is based on documented evidence, photographs, operational data, safety incidents, and firsthand observations that reveal a pattern of red flags — red flags that no responsible city, agency, or regulatory body should ignore. The residents of Herculaneum deserve transparency, accountability, and protection. Instead, they have been left with diesel noise, inadequate mitigation, hazardous materials exposure, and a complete failure of the safeguards they were led to believe would be in place.</p> <p>I am raising these concerns because the people of this city matter. Their homes matter. Their safety matters. Their quality of life matters. And I will not allow their voices to be dismissed or overshadowed by corporate convenience or municipal shortcuts.<br/>[sic]</p> <p><b>Conclusions:</b> Provided concerns do not fall under the jurisdiction of the department. An email was sent to the concerned party notifying her of the department review and correct jurisdictional authority.</p> |               |                    |                                 |                             |                        |        |                    |              |
| 65658                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 04/02/2026    | 04/07/2026         | Isonova                         | Odor                        | Verona /Lawrence       | SWRO   | JW                 | Other        |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> From an online form: "Isonova Inc. sprays something from a tanker truck on some fields around their plant. They also have a tractor that sprays it also. It smells awful and probably gets into drinking water."</p> <p>(note- I was unsure if this fell under land application for agriculture or not. Also, 'probably gets into drinking water' I don't believe warrants a separate concern) [sic]</p> <p><b>Conclusions:</b> CON-2222</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |                    |                                 |                             |                        |        |                    |              |
| 65659                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 03/20/2026    | 03/25/2026         | Scott Hickinbotham              | Open Burning                | Robertsville /Franklin | SLRO   | PT                 |              |
| <p><b>Concerned Party:</b> Sherryl Mckinney</p> <p><b>Concern Info:</b> Interviewee States: " My neighbor owns a rental property located at 4901 Highway N., Robertsville, MO 63072. His name is Scott Higgenbotham. He lives in St. Clair MO. Has been burning plastic and rubber containing durable goods in his yard constantly for 3 weeks. There are 3 piles of debris in the yard that he is preparing to burn. He is the landlord and is cleaning up a mess left by a tenant that was a serious hoarder. The smell from the burning plastics and rubber is sickening" He has violations from the county for the mess and burning in the past" [sic]</p> <p><b>Conclusions:</b> No violations were observed at the time of the investigation. I provided the new tenants with an Open Burning Fact Sheet and my contact information, and I will send the landlord a follow-up letter.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |               |                    |                                 |                             |                        |        |                    |              |
| 65662                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 03/23/2026    | 03/27/2026         | MTI Boats                       | Fugitive Particulate Matter | /St. Charles           | SLRO   | MC                 |              |
| <p><b>Concerned Party:</b> Brian</p> <p><b>Concern Info:</b> We received an odor and dust concern from the DNR website. The CP states: I worked there at the time, MTI boats. 165 Enterprise dr, wentzville and their additional shops across the street. Noticing significant amount of visible dust coming from factory, in addition to finding significant amount of dust embedded in paint of my vehicles and others, it does not just wipe off. Near the middle building you can also smell strong chemical odor outside of the building on the north side. The CP lists Michael Yahl as the general manager. [sic]</p> <p><b>Conclusions:</b> No violations of dust or odor rules were determined during the investigations. Specific findings found during the inspection can be found in the resulting report.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |               |                    |                                 |                             |                        |        |                    |              |

| <p><b>Concerned Party:</b> William Womack</p> <p><b>Concern Info:</b> We received an odor concern from the I-70/I-270 Area Online Odor Site. The CP is experiencing a strong manure odor. The CP notes that the odor occurs after it rains. [sic]</p> <p><b>Conclusions:</b> I conducted an odor investigation on April 1st, 2026, while it was raining. I did not notice any odors. I called the CP and he stated the odor is a result of sewer backup. The CP was told to call the MSD. He agreed to do so. .</p>                                                                                                                                                                                                                                                                                                                                                            |               |                    |                                 |                             |                          |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> I have complained about the residence 78 Sommer Rd. Multiple times and am wondering why nothing has been done? Hager is bringing outside trash from his other businesses into his back yard and made it into a dump. All kinds of stuff back there, including Styrofoam, furniture, building debris etc. Not only is trash blown all over the neighborhood, but Saturday night he attempted to burn the pile. The odor, the trash, the littering, the dump, the bringing outside trash needs to stop!!!! Please do something. I have put in several complaints and do not understand why nothing has been done. [sic]</p> <p><b>Conclusions:</b> An Unsatisfactory Findings letter was mailed on March 12, 2026. The responsible party will have until April 13, 2026, to remove the solid waste on site.</p> |               |                    |                                 |                             |                          |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> The CP has learned that the landfill is receiving waste from Tyson in Pettis County and it is creating a strong odor. It can be smelled approximately five miles away from the landfill in Warrensburg. The CP thinks the Tyson plant is cleaning out a waste lagoon and it is being sent to the landfill, which is causing the odor. Tyson has not been removing the soil/waste due to the recent rains, but plans to resume throughout the summer. [sic]</p> <p><b>Conclusions:</b> Show-Me Regional Landfill was found to be accepting very odorous, wet lagoon sludge, which could not be managed correctly as a special waste as it needed to dry out before it could be worked into the landfill face. On April 7, 2026, Show-Me notified Tyson that they could no longer accept the wet lagoon waste and that Tyson must find a way to dry out the product prior to bringing it to the landfill so it could be covered as required by the solid waste regulations.</p> <p>The lagoon sludge odor was perceived at a 7:1 filtered to ambient air dilution when standing next to the pile, but no odor violation could be confirmed outside the property boundaries.</p> <p>The solid waste unit was notified of the sludge issue at the landfill.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |               |                    |                                 |                                    |                      |        |                    |                          |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> The concerned party has noticed that a company is marking everything. Two weeks ago they removed the tree that fell on the building. The company has a bobcat that is being used to demolish the building. There is a concern that asbestos and lead are in the dust being generated from the demolition. [sic]</p> <p><b>Conclusions:</b> Building is a single-family house and is not subject to the department's asbestos regulations unless part of a larger project. Concern referred to City Codes.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |               |                    |                                 |                                    |                      |        |                    |                          |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> The concern was submitted via the online webform. The concern stated "This is an environmental concern regarding land in the town of Alexandria, MO. The people in this town burn trash as if it is legal and always has been legal (as if it is normal and always has been normal) i guess because no one (including the town board) cares. I also am concerned about the sewer or sewer lateral that wreaks of stench. I don't see how that's legal either! Below is a list of addresses of people or land owners who burn trash on their property and one address is of a person with sewer pipe or sewer lateral ran to the ditch. Those addresses are the following:</p> <p>27291 Mulberry Street (they burn large amounts of trash on ground)<br/> 35808 Market Street (they burn trash on ground behind house)<br/> 2707 Kentucky Street (trailer court area west of town-they burn LARGE amounts of trash)<br/> 27448 Spruce Street (large amount of burnt trash on ground)<br/> 36015 Mulberry Street (barrel and wagon full of trash)<br/> 27203 Walnut Street( Large burn pile with un burn trash in it r.n.)<br/> 27429 Walnut Street (Sewer and trash in barrel)<br/> 35900 Jackson Street (they have large mound of burnt trash &amp; getting ready burn large pile on ground)<br/> 36501 Jackson Street (junk yard owned by Chad King-27197Paw Pawa Street)<br/> 27437 Pecan Street (large amount of trash bags against house and they burn trash to on ground)<br/> 27361 Pecan Street (they burn trash on ground)<br/> 19261 (There is no street name but this street is west of walnut and east of rr tracks- they burn trash on ground)<br/> 411 Clays Street (these 3 digit addresses are because the 911 and postal address doesn't seem to exist)<br/> 327 Jackson Street (same as above) (both burn trash on ground)<br/> 35619 Clay Street (corner of Market and Clay Street0- (they burn trash on ground)</p> <p>Additionally, there is a large amount of people who bring their Rv's and campers during the holidays on the cabin side (southeast) of town and dump their sewer up against the east side levee. That can't be good either. That doesn't even include the more permanent ones who dump their sewer strait into the Mississippi river. Lastly, I'm certain we have not listed all the people who pollute the ground, air, and water but the amount that we have mentioned is a good start and the town is not big, If you drive around we're certain you will find more environmental concerns or more trash being burnt that wasn't listed.</p> <p>Thank you."<br/> [sic]</p> <p><b>Conclusions:</b> The concern was referred to the Clark County Health Department.</p> |               |                    |                                 |                                    |                      |        |                    |                          |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County             | Region | Inspector Initials | Final Action               |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Please help please soon!!! The neighbors at 70 ozark loop Conway Missouri have been piling plastic trash bags for weeks and now are piling some pallets on it getting ready to set it on fire again!!!! They already burned a huge pile last month and it came through the windows on a hot day and made us sick. It smelled for hours and hours. I had to leave for hours just to get fresh air even though I had chores I had to do outside I couldn't! And I had to have my windows open to sleep because it was hot but, the smell made me sick and I couldn't close the windows!! Why can't you do something please! I can't move to a new house. I can't close my windows on hot days! I have to work outside! Do I lose all my rights so someone can burn plastic trash instead of just getting a trash can? I can't go all summer with this !!! Can't you have them haul their trash off or be fined? Or fine them for ruining peoples right to fresh air so often? Something? Please!!!! It's gonna get hotter and hotter and I have to have my windows open! [sic]</p> <p><b>Conclusions:</b> CON-2253<br/>No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the perimeter site investigation. The Open Burning of Household Waste is allowable under this regulation.</p> |               |                    |                                 |                 |                         |        |                    |                            |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> AFB Dog Food Plant in Aurora MO is admitting an obnoxious odor from their factory that can be smelled from at least 2 miles away, and has been for at least a week. The factory is aware of citizens concern and are suppose to keep up with some sort of "odor filter" in the factory to mitigate the smell, but are apparently not doing so. [sic]</p> <p><b>Conclusions:</b> CON-2257<br/><br/>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |               |                    |                                 |                 |                         |        |                    |                            |

| <p><b>Concerned Party:</b> Jesse Hill</p> <p><b>Concern Info:</b> From Webform email - New Report an Environmental Concern 77621 - Submitted at 7:48 pm Sunday, April 5, 2026. Date of Incident or Date First Noticed 04/04/2026.</p> <p>Hello,</p> <p>I submitted a report on 3/5/2026 on the large trash fires my neighbor is setting. Today he set another large fire that smelled of burning plastics and chemicals. It did not smell of normal household waste. As per the request of the Assistant Deputy Chief I contacted the Fort Osage Fire Protection District and they sent out another team to look at it and make a report. [sic]</p> <p><b>Conclusions:</b> The Fort Osage Fire Department responded to a report of illegal burning on April 5, 2026, at Brett Ferguson's residence. The incident narrative from the fire department states that no unauthorized materials were found being burned at that time – only what appeared to be household trash.</p> |               |                    |                                  |                            |                         |        |                    |                             |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Caller reports that a house was burned over the weekend and buried in Brashear at the corner of Oak and Park Streets. States he did not see it himself, but his father saw it and has video and the Sheriff’s Department and police and EPA were informed. Caller did not provide contact information for himself or his father. Caller stated illegal materials were burned probably including asbestos and lead paint. Caller stated he reported this last week prior to the burning (CON-1977). [sic]</p> <p><b>Conclusions:</b> Based upon observations and information obtained during the investigation, it was determined that Clarence C. Miller Jr. is in non-compliance with the Missouri Solid Waste Management Law and Regulations and the Missouri Air Conservation Commission Regulations.</p> <p>UFRR issued on 4/8/2026.</p>                                                                                                                                                                                                                           |               |                    |                                 |                                                            |                  |        |                    |                  |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Caller stated that a property owner has been dumping what they believed to be residential waste on their own property near a creek for quite some time. Caller estimated the waste pile to be approximately 30 feet by 30 feet, between 6 and 10 feet deep, and between 10 and 12 tons. Caller also stated that the source of concern had a burn barrel and had been burning some residential waste as well. Caller stated the waste pile was first noticed at the end of March and that the owner of the home is Thomas Dickerson. Caller believed the owner had already moved out and that the home had been vacant for the last 3 or 4 months. Caller also stated that they believed the residential sewage from the home was being discharged into the pond behind the home. Caller also stated that the property was for sale and currently pending. [sic]</p> <p><b>Conclusions:</b> No violations of the Missouri Solid Waste Management Law were alleged. No on-site investigation was conducted. The concern was administratively Closed on April 6, 2026</p> |               |                    |                                 |                                                            |                  |        |                    |                  |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Received Date | Investigation Date | Suspected Source Owner/Operator        | Concern Type(s)                            | City/County          | Region | Inspector Initials | Final Action            |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Webform states: "The property is located just off Highway WW in Grundy County, Missouri. There is an abundant amount of trash all over the property as well as trash that's now leaving the property and blowing to nearby properties not owned by the owner. The owner's trash is now lining the ditches along highway WW. Their trash has also blown into the neighbors' cattle field, causing hazards for their cattle as well as the wildlife that lives in the abandoned home across the road. On Sunday, March 22, 2026, the owner burned the insides of a pop-up camper. The air was filled with black, nasty-smelling fire smoke. Their trash can even be found at the junction of W and WW in the grass field and timberline northeast of the intersection." [sic]</p> <p><b>Conclusions:</b> Based upon observations and information obtained during the investigation, it was determined that Patrick Behen is in noncompliance with the Missouri Solid Waste Management Law and Regulations and the Missouri Air Conservation Commission Regulations.</p> <p>A report of Unsatisfactory Findings will be issued for the violations determined.</p> <p>UFRR issued on 4/14/2026.</p> |               |                    |                                        |                                            |                      |        |                    |                         |
| 65726                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 03/30/2026    | 03/31/2026         | Residential                            | Open Burning                               | Wright City /Warren  | SLRO   | PT                 |                         |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We received an anonymous open burning concern from the DNR Webpage. The CP states: The people at 28295 S Stringtown Rd burn toxic materials 1-3 times per week for multiple hours. They are also dumping toxic waste in the flood plain by Perque Creek. The CP notes Dwayne Paul is the property owner<br/>Driving Directions<br/>Veteran's Memorial Parkway and S Stringtown Rd in Wright City, MO [sic]</p> <p><b>Conclusions:</b> I did not observe any violations at the time of the investigation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |               |                    |                                        |                                            |                      |        |                    |                         |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We received two identical anonymous cloud seeding concerns (77366 and 77371) from the DNR webpage. The CP states: This is concerning the heavy spraying that has been taken place in the skies from Washington too St Louis. While I was in St Louis a few day ago I watched as multiple planes sprayed the sky until it was a full grid. On my way home you could see the grid turn into a fully cloudy sky then it rained the following day. These are not contrails these are aerosols being sprayed above our heads filled with heavy metals. [sic]</p> <p><b>Conclusions:</b> No investigation was conducted. MDNR does not regulate air emissions from airplanes, which is outside the department's regulatory delegation. For more information, refer to EPA's website: <a href="https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails">https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails</a></p>                                                                                                                                                                                                                                              |               |                    |                                        |                                            |                      |        |                    |                         |

| <p><b>Concerned Party:</b> Barbra Ummel</p> <p><b>Concern Info:</b> CP is concerned about the active land disturbance located off of 78 Hwy in Independence MO. High winds are producing large amounts of dust because of lack of BMPs. CP is concerned about the dust and the health of the area. They stated that area had been bulldozed and no trees are located at the sight and nothing is keeping dust down. [sic]</p> <p><b>Conclusions:</b> During my investigation, while Haupt Construction was performing excavation work, I was unable to confirm dust leaving the property boundaries. Because it had rained the previous night, the dust issues had decreased from when the concern was reported. Representatives for Haupt Construction and ARCO Construction were contacted and provided the fugitive dust regulations. Both indicated understanding of their responsibilities on maintaining dust control over the data center construction site. An additional water truck was brought to the site to help with dust control.</p>      |               |                    |                                                               |                                              |                       |        |                    |                         |
| 65739                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 04/03/2026    | 04/06/2026         | Hurt III Construction                                         | Asbestos                                     | St. Joseph /Buchanan  | KCRO   | JS                 | Phone Conversation      |
| <p><b>Concerned Party:</b> Andrew Madget</p> <p><b>Concern Info:</b> Email from Senora Cressman, Air Pollution Control Program Asbestos Unit: I received a concern call from Andrew Madget regarding D13064-2026. He said they demolished the structure with the transite in place, and it is in a pile on the ground. I told them in their NOR letter that if they chose to perform a wet demo, they would need a trained asbestos professional onsite. It does not appear they have complied with that direction. If the debris is co-mingled, they would need to burrito wrap the dumpsters and all the debris would have to be disposed of as co-mingled asbestos debris. [sic]</p> <p><b>Conclusions:</b> The house at 2017 Union Street reportedly collapsed during the attempted removal of the transite siding and therefore was not intentionally demolished with the transite in place. The debris will be properly disposed of as asbestos-containing waste due to the presence of the transite siding intermingled with the other debris.</p> |               |                    |                                                               |                                              |                       |        |                    |                         |

| <p><b>Concerned Party:</b> Amber Bass</p> <p><b>Concern Info:</b> Well.....I know this is not the first nor the last time you have received concerns, complaints, or reports about the hazardous toxic putrid situation we have with Midwest Organics Solutions located in Jasper MO. I do want to share happy news.....my son and daughter in law just announced they are expecting their first child my first grandchild. We are all over the moon with this blessing. Tonight my daughter in law made a visit to my home that neighbors this putrid place, Midwest Organic Solutions. As she drove by Midwest Organic Solutions to get to my home, the hazardous toxic polluted air entered her vehicle. She could not get the toxic air out of her car and it made her SICK!!!!!! I do know for fact...this toxic putrid polluted air has led to 2 individuals to getting bacterial respiratory infections. It will be truly shameful of ALL those participating in giving permits and coordinating a successful business route for a company that is so toxic to its community to continue to operate. Back to my telling you of my expecting daughter in law who has now been physically affected by this horrific situation. We pray she is strong and doesn't contract any health problems after contracting the toxic air in her lungs AND the smell was still in her vehicle when she arrived home, 4 miles from the toxic site. Please advise and respond why this situation is something that WE have to change our lives for. We didn't invite it into our community. This "company" has flat out lied to neighbors, its very own lender, its insurance company, Jasper County Commissioners, State Senator, State Representative, news broadcasting, and DNR. Yes, lied to you. I can not believe DNR would protect and permit harm upon others. Location: 11354 Thorn Road Jasper, MO [sic]</p> <p><b>Conclusions:</b> CON-2320<br/>I did not observe any violations during this investigation. No action is required.</p> |               |                    |                                 |                                 |                      |        |                    |                          |
| 65745                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 04/09/2026    | 04/10/2026         | Contrails                       | Hazardous Air Pollutant Release | Kansas City /Jackson | KCRO   | MC                 | Referred to Other Agency |
| <p><b>Concerned Party:</b> Kathleen</p> <p><b>Concern Info:</b> From Voicemail received on KCRO Main Line 04/09/2026- call transferred from Bryan Krapp (?) Caller left VM with the following: Why are there so many chemtrails being sprayed in the skies over the last few weeks. Its messing with our health. They are not the contrails from the airplanes. I know you think were stupid but we're not. They are sticking around the whole day. I want a call back about why the people of Missouri are being poisoned. If I don't get a call from you I'll keep going up the ladder. [sic]</p> <p><b>Conclusions:</b> The concern involves mobile sources (aircraft), which is outside the department's regulatory delegation; therefore, the concern was referred to EPA.<br/><br/>For more information, refer to EPA's website: <a href="https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails">https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails</a></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |               |                    |                                 |                                 |                      |        |                    |                          |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Caller reports that Kelly Bruce has been bringing in household trash from people in the area and C/D waste from contractors in the area then sorting the items and burning the items he does not want. The burn area is on the north side of the property inside a large metal burn ring. Caller also stated that this has been going on for years but recently the smoke and odors have become overwhelming. [sic]</p> <p><b>Conclusions:</b> Observed a burn pile about ten feet diameter in fenced area, appears to contain boxes and plywood sheets, unable to identify most materials without access. No answer at door, left information sheets and a card with a note on the door. Photo from the front walkway. Sending contact letter.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |               |                    |                                 |                                 |                      |        |                    |                          |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> From Webform email - New Report an Environmental Concern 77961 - Submitted at 3:26 pm Friday, April 10, 2026. Date of Incident or Date First Noticed 04/01/2026.</p> <p>3983 Winchester Ave.. up the hill you can see cars on their side draining fluids some at the top of the hill. They are burning car materials all of the time Kansas City Fire Dept has been there of due to them setting cars on fire and all day today 4/10 there is smoke coming from top of the hill and last night KCFD was there for a fire. This is some kind of scrappers paradise, people might be live on the site as well. Reported this several times to KCMO 311 action center and they keep passing it off and cancelling the ticket not sure what is going on there. [sic]</p> <p><b>Conclusions:</b> This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.</p>                                                   |               |                    |                                 |                                         |                      |        |                    |                    |
| 65771                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 04/10/2026    | 04/13/2026         | Square 109 Restaurant & Bar     | Asbestos                                | Clinton /Henry       | KCRO   | CK                 | Phone Conversation |
| <p><b>Concerned Party:</b> Jeff</p> <p><b>Concern Info:</b> Restaurant at 109 S. Washington St., Clinton, MO (Square 109 Restaurant &amp; Bar) plans on removing a wall and replacing it next week. Concerned that asbestos inspection has not been done. It is unclear if load bearing walls will be removed. Also concerned that the waste will not be property disposed of. [sic]</p> <p><b>Conclusions:</b> Lankfords 109 Restaurant &amp; Bar LLC plans to remove the entire back wall for building repairs. For the purposes of interpreting 40 CFR Part 61, Subpart M (the Asbestos NESHAP), a renovation involves "altering a facility or one or more facility components in any way." Using this definition, Troy Ryan was told that prior to the work on the back wall, a certified asbestos inspection must be conducted and was provided a link to contractors approved to perform asbestos work in Missouri. He was also notified that if the back wall was considered load supporting, then it would be considered a demolition and a notification would need to be submitted to the department's asbestos unit.</p> |               |                    |                                 |                                         |                      |        |                    |                    |
| 65772                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 04/10/2026    | 04/16/2026         | Dylan Burns                     | Odor                                    | Jasper /Jasper       | SWRO   | JW                 | Phone Conversation |
| <p><b>Concerned Party:</b> Shawna Farmer</p> <p><b>Concern Info:</b> date of Incident: 1/7/2026<br/>"This smell has been on going for some time now. Its making us sick and puking, even if our doors are closed, we can be in our yard. This is a health hazard and needs to be addressed ASAP. I know yall can smell it, I mean half of jasper has complained several times. THIS IS AFFECTING PEOPLE BREATHING ITS A HEALTH ISSUE... [sic]</p> <p><b>Conclusions:</b> CON-2348</p> <p>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |               |                    |                                 |                                         |                      |        |                    |                    |

| <p><b>Concerned Party:</b> Jeff</p> <p><b>Concern Info:</b> Restaurant at 210 S. Washington St., Clinton, MO, conducting a renovation of the whole downstairs. The city inspector may have already stopped the project because they did not get right city permits. Concerned party believes the name of the restaurant is Newsroom Bar &amp; Grill. Concerned that asbestos inspection has not been done. It is unclear if load bearing walls will be removed. Also concerned that the waste will not be properly disposed of. [sic]</p> <p><b>Conclusions:</b> Business is not undergoing any renovations at this time. Community Development Director of the City of Clinton has confirmed that this business is shut down and nothing is happening at this location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |               |                    |                                         |                                            |                         |        |                    |                    |
| 65774                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 04/10/2026    | 04/16/2026         | Dylan Burns                             | Odor                                       | Jasper /Jasper          | SWRO   | JW                 | Phone Conversation |
| <p><b>Concerned Party:</b> Warren Gray</p> <p><b>Concern Info:</b> Date of Incident or Date First Noticed: 1/7/2026<br/>Smell makes you wanna puke everytime you walk outside. Its causing breathing problems and our inside of house is smelling bad as well. Today is awful yall need to come out to our address which is given and use your meter to see how bad the smell is. This has been on going and its ridiculous how people do not wanna address the health concerns and environmental concerns. [sic]</p> <p><b>Conclusions:</b> CON-2350<br/>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |               |                    |                                         |                                            |                         |        |                    |                    |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Online concern states "Corner of z and 65 Burning toxic rubber and burying trash" [sic]</p> <p><b>Conclusions:</b> At site, observed dirtwork in progress. Observed brush pile with some junk mixed in and a small pile of junk to the side and a pile of tires to the side. I spoke with Tug Summers, who identified himself as the owner. I asked about the property and he said they took possession of the property March 15 and there was an old barn burned before then and they haven't had a fire for a long time. I asked if they had burned any demolition waste and he said nothing burned since they bought it. I noted some of the brush showed char and there was a faint odor of ash. He said he intended to use dirt and debris as fill. I told him the demolition waste would need to be sent to a landfill and the tires would need to be disposed of properly. I also stated that land clearing waste could be burned if he could ensure a 200 yard setback from occupied buildings. He said they own the vacant house on the property, so the setback can be achieved. I asked about Vince Campbell and Gill Gates and he said Vince did work for them and Gill was their permits guy. 4/9 he emailed me a dumpster receipt showing 0.18 tons of C&amp;D waste and stated the tires were placed in a Connex box. I estimated the amount of debris I observed could have been about 0.18 tons.</p> |               |                    |                                         |                                            |                         |        |                    |                    |
| 65780                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 04/10/2026    | 04/13/2026         | University of Central Missouri          | Asbestos<br>Fugitive<br>Particulate Matter | Warrensburg /Johnson    | KCRO   | JS                 | Other              |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> EPA Report a Violation Date: 03/26/2026 21:06; EPA Incident Received Date: 04/10/2026<br/>Demolition of building without proper precautionary and containment measures. It is releasing high levels of silica particles, mold, dust, and asbestos particles into the air.<br/>Alleged Violator's Latitude / Longitude: 38.759040 / -93.738740<br/>Alleged Violator's FRS ID: 110041067181 [sic]</p> <p><b>Conclusions:</b> It is assumed the concern referred to the demolition of Hudson Hall and the University Conference Center (D12924-2025) since no specific location was provided. Asbestos abatement of the buildings was performed prior to demolition. No dust was observed during the investigation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                         |                                            |                         |        |                    |                    |

| <p><b>Concerned Party:</b> Karl Wilen, Owner, RennsportKC</p> <p><b>Concern Info:</b> KC Processing emits an extremely offensive in odor. While it isn't every day, this week for example, it has been awful on three days. The smell of weed permeates my building and customers have been complaining about it. I deal in high end automotive repair (Porsche) and even customer car interiors are starting to pick up the smell. My own personal vehicle will smell on occasion from it, sitting outside with the windows up. [sic]</p> <p><b>Conclusions:</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |               |                    |                                       |                 |                    |        |                    |                         |
| 65788                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 03/25/2026    | 03/26/2026         | Heartland Application - Jeff Limbaugh | Other           | Sikeston /Scott    | SERO   | JW                 | Communication In Person |
| <p><b>Concerned Party:</b> Linda Williams</p> <p><b>Concern Info:</b> cp states:<br/>There is a very foul smell coming from behind the school - they think it is the farm located behind the school; however, the CP states that her friend lives in a nearby town (Morley) and can smell the stinch as well. They say it smells like something is dead. Thought it might have been fertilizer but are not sure as the smell is so strong and they would like for someone to find out what it is. Grandbabies have to put shirts over their faces during recess at school. [sic]</p> <p><b>Conclusions:</b> On March 26, 2026, I conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/>On March 27, 2026, Environmental Supervisor Jesse Evans conducted odor monitoring. Refer to the odor monitoring data sheet for details.<br/>On March 27, 2026, I contacted the concerned party and discussed odor monitoring investigation efforts conducted and odor regulations. No specific timelines for strongest odors were provided.<br/>On March 27, 2026, I contacted Jeff Limbaugh with Heartland Applications. I advised him of the concerns the department had received in the last two days. Mr. Limbaugh advised he had received complaints as well, and prior. Mr. Limbaugh advised conversations with the Scott County Central High School Superintendent, in attempt to limit efforts that could lead to odors during events at the school (referencing a schedule). Mr. Limbaugh stated that he intends to raise corn crops on his property where application is applied and stored for transporting. Mr. Limbaugh referenced providing the material for application to adjacent properties, not solely his own.<br/>On April 7, 2026, Jesse Evans performed additional odor monitoring and discussed site conditions with Jeff Limbaugh. Refer to the odor monitoring data sheet for details.</p> |               |                    |                                       |                 |                    |        |                    |                         |
| 65790                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 03/26/2026    |                    | Heartland Application - Jeff Limbaugh | Other           | Sikeston /Scott    | SERO   | JW                 | Communication In Person |

| <p><b>Concerned Party:</b> Edward Andrews</p> <p><b>Concern Info:</b> Sulfur or sewage smell has been off and on for probably over a year. The last few days this has gotten so strong, people in the community have been experiencing headaches. Not sure if this is from a farm nearby or where the source is. It has been worse when warmer temperatures. [sic]</p> <p><b>Conclusions:</b> On March 26, 2026, I conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/> On March 27, 2026, Environmental Supervisor Jesse Evans conducted odor monitoring. Refer to the odor monitoring data sheet for details.<br/> On March 27, 2026, I left a voicemail for the concerned party. No response was received.<br/> On March 27, 2026, I contacted Jeff Limbaugh with Heartland Applications. I advised him of the concerns the department had received in the last two days. Mr. Limbaugh advised he had received complaints as well, and prior. Mr. Limbaugh advised conversations with the Scott County Central High School Superintendent, in attempt to limit efforts that could lead to odors during events at the school (referencing a schedule). Mr. Limbaugh stated that he intends to raise corn crops on his property where application is applied and stored for transporting. Mr. Limbaugh referenced providing the material for application to adjacent properties, not solely his own.<br/> On April 7, 2026, Jesse Evans performed additional odor monitoring and discussed site conditions with Jeff Limbaugh. Refer to the odor monitoring data sheet for details.</p>                                                                                                                                                                                                                                                                                                                             |               |                    |                                       |                 |                 |        |                    |                         |

| <p><b>Concerned Party:</b> Cynthia McCray</p> <p><b>Concern Info:</b> CP states:<br/> Probably for over a year now, the town has had a terrible odor. It has deter people from visiting and even making people sick. Soon as you enter near the city limit the smell hits you. CP states her and her grandson can not even go outside to play or do any outdoor activities because of this. She believes it is coming from the North field are by Haywood City Water tower? Even sometimes smells like dead animals decaying. It is worse or stronger when the weather is warmer. [sic]</p> <p><b>Conclusions:</b> On March 26, 2026, I conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/> On March 27, 2026, Environmental Supervisor Jesse Evans conducted odor monitoring. Refer to the odor monitoring data sheet for details.<br/> On March 27, 2026, I contacted the concerned party and discussed odor monitoring investigation efforts conducted and odor regulations. No specific timelines for strongest odors were provided.<br/> On March 27, 2026, I contacted Jeff Limbaugh with Heartland Applications. I advised him of the concerns the department had received in the last two days. Mr. Limbaugh advised he had received complaints as well, and prior. Mr. Limbaugh advised conversations with the Scott County Central High School Superintendent, in attempt to limit efforts that could lead to odors during events at the school (referencing a schedule). Mr. Limbaugh stated that he intends to raise corn crops on his property where application is applied and stored for transporting. Mr. Limbaugh referenced providing the material for application to adjacent properties, not solely his own.<br/> On April 7, 2026, Jesse Evans performed additional odor monitoring and discussed site conditions with Jeff Limbaugh. Refer to the odor monitoring data sheet for details.</p> |               |                    |                                       |                 |                 |        |                    |                         |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Received Date | Investigation Date | Suspected Source Owner/Operator       | Concern Type(s) | City/County     | Region | Inspector Initials | Final Action            |

| <p><b>Concerned Party:</b> Cynthia McCray</p> <p><b>Concern Info:</b> CP states:<br/>Probably for over a year now, the town has had a terrible odor. It has deter people from visiting and even making people sick. Soon as you enter near the city limit the smell hits you. CP states her and her grandson can not even go outside to play or do any outdoor activities because of this. She believes it is coming from the North field are by Haywood City Water tower? Even sometimes smells like dead animals decaying. It is worse or stronger when the weather is warmer. [sic]</p> <p><b>Conclusions:</b> On March 26, 2026, I conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/>On March 27, 2026, Environmental Supervisor Jesse Evans conducted odor monitoring. Refer to the odor monitoring data sheet for details.<br/>On March 27, 2026, I contacted the concerned party and discussed odor monitoring investigation efforts conducted and odor regulations. No specific timelines for strongest odors were provided.<br/>On March 27, 2026, I contacted Jeff Limbaugh with Heartland Applications. I advised him of the concerns the department had received in the last two days. Mr. Limbaugh advised he had received complaints as well, and prior. Mr. Limbaugh advised conversations with the Scott County Central High School Superintendent, in attempt to limit efforts that could lead to odors during events at the school (referencing a schedule). Mr. Limbaugh stated that he intends to raise corn crops on his property where application is applied and stored for transporting. Mr. Limbaugh referenced providing the material for application to adjacent properties, not solely his own.<br/>On April 7, 2026, Jesse Evans performed additional odor monitoring and discussed site conditions with Jeff Limbaugh. Refer to the odor monitoring data sheet for details.</p>                                                              |               |                    |                                       |                 |                 |        |                    |                         |

| <p><b>Concerned Party:</b> Mayor Johnny Avance</p> <p><b>Concern Info:</b> Smelling odor from land application occurring to the east of Scott County Central School. The odor is noticeable from the school area and in Haywood City to the north of the fields. The odor is strong enough that it is causing people to get physically ill. The odor is also deterring other schools from visiting for sports and other events that take place at Scott County Central, hindering the students and community. [sic]</p> <p><b>Conclusions:</b> On March 26, 2026, I conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/>On March 27, 2026, Environmental Supervisor Jesse Evans conducted odor monitoring. Refer to the odor monitoring data sheet for details.<br/>On March 27, 2026, I contacted Mayor Avance and discussed odor monitoring investigation efforts conducted and odor regulations. I advised him of the conversation with Mr. Limbaugh. I discussed intentions to attempt to periodically monitor the area when in the area and in ideal weather conditions (wind direction, etc).<br/>On March 27, 2026, I contacted Jeff Limbaugh with Heartland Applications. | <p><b>Concerned Party:</b> Paul Johnson</p> <p><b>Concern Info:</b> I work for the school board and have noticed the odor from the nearby field has been very noticeable recently. I believe it is typically when they are spraying the material. The odor has been so bad that other schools are not wanting to visit our school which impacts the students and the community. The odor happens usually 3-4 days per week. [sic]</p> <p><b>Conclusions:</b> Upon receiving the concern, I reached out to Paul to discuss the concern received. We discussed how the department regulates and conducts odor monitoring. He provided additional information about times he noticed the odor and the difficulties the school has faced due to the odor. I offered to meet him in person when I conducted my odor monitoring to show him how the nasal ranger works.<br/> On March 26, 2026, Environmental Manager Josh Wilkerson conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/> On March 27, 2026, I met with Paul at Scott County Central School where we initiated discussion on odor monitoring. Paul encouraged me to meet with Brian Hukel, Superintendent, as well. We went to Brian's office where I introduced myself and my intent to conduct odor monitoring in regards to Heartland Application. We discussed the odor regulation and I showed them how the odor monitoring equipment functioned. I thanked them for my time before leaving the school. I began my odor monitoring at approximately 11:55 am (see attached odor monitoring form, dated March 27, 2026) and ended my odor observations at approximately 1:14 pm. During my observation, I did observe the compost/litter odor that was described, but I did not detect it with the nasal ranger.<br/> On March 27, 2026, Josh Wilkerson contacted Jeff Limbaugh with Heartland Applications. He advised him of the concerns the department had received in the last two days. Mr. Limbaugh advised he had received complaints as well, and prior. Mr. Limbaugh advised conversations with the Scott County Central High School Superintendent, in attempt to limit efforts that could lead to odors during events at the school (referencing a schedule). Mr. Limbaugh stated that he intends to raise corn crops on his property where application is applied and stored for transporting. Mr. Limbaugh referenced providing the material for application to adjacent properties, not solely his own.<br/> On April 7, 2026, Jesse Evans performed additional odor monitoring and discussed site conditions with Jeff Limbaugh. Refer to the odor monitoring data sheet for details.</p> |               |                    |                                       |                 |                     |        |                    |                         |
| 65802                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 03/26/2026    | 03/26/2026         | Heartland Application - Jeff Limbaugh | Odor            | Sikeston /Scott     | SERO   | JW                 | Communication In Person |
| <p><b>Concerned Party:</b> Derrick Jones</p> <p><b>Concern Info:</b> smell in air like death, knows others have called but would like someone to take a look into this [sic]</p> <p><b>Conclusions:</b> On March 26, 2026, I conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/> On March 27, 2026, Environmental Supervisor Jesse Evans conducted odor monitoring. Refer to the odor monitoring data sheet for details.<br/> On March 27, 2026, I left a voicemail for the concerned party. No response was received.<br/> On March 27, 2026, I contacted Jeff Limbaugh with Heartland Applications. I advised him of the concerns the department had received in the last two days. Mr. Limbaugh advised he had received complaints as well, and prior. Mr. Limbaugh advised conversations with the Scott County Central High School Superintendent, in attempt to limit efforts that could lead to odors during events at the school (referencing a schedule). Mr. Limbaugh stated that he intends to raise corn crops on his property where application is applied and stored for transporting. Mr. Limbaugh referenced providing the material for application to adjacent properties, not solely his own.<br/> On April 7, 2026, Jesse Evans performed additional odor monitoring and discussed site conditions with Jeff Limbaugh. Refer to the odor monitoring data sheet for details.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |               |                    |                                       |                 |                     |        |                    |                         |
| 65803                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 04/13/2026    | 04/14/2026         | Larry Wald                            | Odor            | Carterville /Jasper | SWRO   | JW                 | Phone Conversation      |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Smell is rank first thing this morning! South wind today and probably the next few days... please come experience what we are going through. Smells like a sweaty pair of socks worn for a week without changing and someone is cramming them in your face. Just keep in mind.. whatever you smell, it's very likely not the worst it gets. There have been times I had to run to my car and go home because I could not take it anymore. Please come help us... this is not fair!" [sic]</p> <p><b>Conclusions:</b> CON-2363<br/> I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                       |                 |                     |        |                    |                         |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> From Webform email - New Request for Assistance 78106 - Submitted at 4:54 pm Monday, April 13, 2026. Request for Assistance</p> <p>Cambridge Elementary in Belton,MO had several lower level classrooms flood two weeks ago. It is currently pulling up asbestos tiles that were ruined. Staff was informed Friday about the asbestos removal done by the district. Staff reports that workers wearing t shirts and pants (no hazmat suits) Staff say doors were not properly sealed at first and that removal of wet asbestos materials were carried out, unsealed in workers hands and carried through a classroom and out the doors. They are very concerned that safely rules and laws are being violated and corners are being cut to save money. OSHA claims it's not in their jurisdiction to investigate. Classes are still being held near the classrooms that asbestos is being removed. Staff is very afraid and upset. Please help! [sic]</p> <p><b>Conclusions:</b> Removal work was complete at the time of investigation. Work involved the removal of floor tile and mastic using hand tools. Removal appears to be in compliance with asbestos air pollution regulations.</p> |               |                    |                                                         |                 |                       |        |                    |                    |

| <p><b>Concerned Party:</b> Henry Carner</p> <p><b>Concern Info:</b> Concerned about the 398-acre data center being built in Independence near Lake City Army Ammunition Plant. Wants to know if a study has been done or would be required to determine if the aquifer has been contaminated.</p> <p>If a study has not been done, is there a way to require the city council to have an environmental assessment done. Thinks a study should be done since it is in the Little Blue River Watershed, since there is a large aquifer under the site, and since it is less than a mile away from a superfund site.</p> <p>Also heard there was a regulation that prevented data centers within 50 miles of a military base. Would we have any information on the existence of such a rule and who enforces it? [sic]</p> <p><b>Conclusions:</b> Henry Carner's initial questions were answered. Information on the department's website and other resources were also provided. No additional actions will be taken at this time.</p>                                                                                                                                                                                                                            |               |                    |                                                         |                 |                       |        |                    |                    |

| <p><b>Concerned Party:</b> Steve Converse</p> <p><b>Concern Info:</b> CP indicates the odor from C&amp;L Grease on Sunday, April 12th, was horrible and CP could not even go outside, this lasted for four hours. This morning the odor is still pretty bad, but it comes and goes. CP believes that whatever they are doing is specifically done on the weekends purposefully, as last Sunday was also terrible odor wise. [sic]</p> <p><b>Conclusions:</b> CON-2365<br/>I did not observe any violations during this investigation. No action is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |               |                    |                                                         |                 |                       |        |                    |                    |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> I There is a small stream near my home and I've seen what looks like asbestos fiber board - the old wavy kind from the 60s in it. Is it illegal for people to toss yard waste and debris over the fence into this stream? There's a lot of recent activity of this nature and it's concerning that it could be releasing toxins and clogging up the storm drains resulting in flooding of contaminated water, especially since this stream is known to flash flood in torrential rains. The property owner invited me to look at the work he had done removing the invasive honeysuckle and I informed the property owner that it looked very nice but absolutely no refuse or yard waste should be placed in the waterway and that I would report him<br/> Driving Directions<br/> MS9 Wrenwood Court<br/> Webster Groves, Missouri. 63119<br/> D easement for storm water and creek behind 9 Wrenwood court [sic]</p> <p><b>Conclusions:</b> Material has been removed from the creek.</p> |               |                    |                                        |                                                  |                           |        |                    |                          |

| <p><b>Concerned Party:</b> Delbert gaddis</p> <p><b>Concern Info:</b> From Webform email - New Report an Environmental Concern 78226 - Submitted at 4:00 pm Wednesday, April 15, 2026. Date of Incident or Date First Noticed 03/19/2026</p> <p>Missouri organic recycling located at 5923 Nebo Hills Rd , Liberty, Mo . We can't go outside due to the odor coming from this establishment. It has been stinking for 5 days straight now. In the past the odor would come and go but it is horrific. We've been to the location in the past and they apparently think it's my problem NOT theirs. It literally smells like sour mold. Take 291 to old 210hwy heading east you won't miss it just roll down your window! [sic]</p> <p><b>Conclusions:</b> The odor at Missouri Organic was confirmed to be at or above the regulatory threshold. Facility will be issued an Unsatisfactory Findings and must provide a plan to mitigate the odor in a timely manner in order to return to compliance.</p>                                                     |               |                    |                                        |                                                  |                           |        |                    |                          |

| <p>LOW, RTC, UF</p> <p><b>Concerned Party:</b> Russell Hannum</p> <p><b>Concern Info:</b> Phone call and Received by email:<br/>CP states:<br/>Incident occurred at 11:33 am. Arvil Chronister burned 2 large (7 feet high) mounds of tires. Not small tires bigger truck tires. The burning brought lots of smoke and debris. Strong amount of black smoke. The sheriff was called about this. However, he was lied to by Arvil. He stated he was not burning tires or anything other than normal trash. Russell (CP would supply additional details if needed) [sic]</p> <p><b>Conclusions:</b> Refer to Letter of Warning issued 04/15/2026 for further information.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |               |                    |                                 |                 |                           |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We received an environmental concern from the DNR website. The CP states: Can you please stop these planes from blocking out the sun? It's been going on for years. Enough is enough. I don't know why they do it- but they are doing it. Driving Directions<br/>In the sky. They are probably flying out of chesterfield airport [sic]</p> <p><b>Conclusions:</b> No investigation was conducted. MDNR and St. Louis County APCP does not regulate air emissions from airplanes, which is outside the department's regulatory delegation. For more information, refer to EPA's website: <a href="https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails">https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails</a></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |               |                    |                                 |                 |                           |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We received an open burning concern from the DNR EER Melody Scott. On 3/26/2026 the concerned party let SOSC Scott know there was brush and shingles being burned at the adjacent property. SOSC Scott called the St Clair Fire Protection District Station 1, and they provided a name and phone number for the property owner. This information was given to the St Louis Regional Office (SLRO) and the incident is being referred to SLRO solid waste and air pollution for further action. State On-Scene Coordinators (SOSCs) Melody Scott, Abigail Blum, and Cody Strawman were on site. SOSCs screened using an Accurad and Ludlum 3001 and found no radiological readings above background radiation, about 3.5-4 millirems per hour, on the concerned party's property. SOSCs could not see the placard on the storage container from the adjacent property. SOSCs discovered a scrap tire pile and a scrap metal pile at 6059 Willow Ford Road. [sic]</p> <p><b>Conclusions:</b> We did not observe illegal dumping from the roadside. Nor could we locate any dumping activities due to lack of information given by the concerned party. We will need more information from the concerned party or access to property were the activity can be observed in order to better investigate any potential illegal dumps and/or burns.</p> |               |                    |                                 |                 |                           |        |                    |              |
| 65859                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 04/13/2026    | 04/13/2026         | Unknown                         | Odor            | St. Louis /St. Louis City | SLRO   | CW                 |              |
| <p><b>Concerned Party:</b> Molly McBride</p> <p><b>Concern Info:</b> We received an odor concern from the I-70/I-270 Area Online website. The CP is experiencing an strong sewer odor and states: Everyone in several blocks of this area is reporting this smell since 8am. I haven't even gone outside today yet [sic]</p> <p><b>Conclusions:</b> No violations noted. I called the CP and left a message explaining that the point of contact for reporting sewage odor is St. Louis MSD, and I included the MSD 24/7 emergency line for future reference.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                 |                 |                           |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Water has sediment, unsafe ? [sic]</p> <p><b>Conclusions:</b> I conducted this concern investigation on the morning of April 14, 2026. The CP was complaining about sediments/particulates in the drinking water. During the investigation, no sediments/particulates were observed in the water sampled. No discoloration or odors were observed either. I checked for sediments/particulates in the back of the toilet box and did observe a thin layer (not sand). The CP wondered if water hardness could be the issue. I conducted the following at a residence on the property that is owned by the CP (18465 CR 405):</p> <p>Hardness (bathroom sink) - 16 mg/L<br/> (1) bacteriological sample (bathroom sink) - SAFE<br/> No further action required. The department contacted the water district and recommended that CR 405 be routinely flushed since it's a long line with only a few customers.</p>                                                                                                                                                                                                                                                                                 |               |                    |                                            |                                   |                         |        |                    |                            |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> We had a concerned party call into our office with an asbestos concern. She states that there has been a container in the lot between the demo and her residence with clearly marked asbestos warnings for the last two weeks. She also said that the building was vacant and was going to be a residential and commercial property after demolition. The CP followed up the concern with an email with more details. [sic]</p> <p><b>Conclusions:</b> 4/7/26-AE- The property of concern is located in Clayton so I emailed the St. Louis County department of Public Health and the concerned party and let them know that this property is outside of MDNR jurisdiction.<br/> Conclusions<br/> Referred to St. Louis County Dept of Public Health APCP.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                    |               |                    |                                            |                                   |                         |        |                    |                            |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP States: Dust from Base Rock Mineral Quarry is so bad with the wind you can't be outside and cant' hardly see. I thought they were supposed to water to help with the dust. With the past three days being so windy, CP is unable to complete yard work outside. Would like to see Quarry apply some water for dust control. [sic]</p> <p><b>Conclusions:</b> On April 1, 2026, I arrived on site and spoke with the scale house tech before speaking with Steven Schwent, Plant Manager. I observed no fugitive emissions leaving the property at the time of investigation. The roads were visibly wet from a recent water. I was informed that the facility operates the water truck multiple times per day of operation depending on the weather conditions and how dry the roads are. One load of water in the water truck is 3,000 gallons. A new water truck was supposed to arrive on site on April 1, 2026, with a water cannon to aid in watering. I reviewed watering documentation that showed the facility has been watering as required. It is notable that the day the concern was received was a very high wind day. No violations were noted at the time of investigation.</p> |               |                    |                                            |                                   |                         |        |                    |                            |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County           | Region | Inspector Initials | Final Action       |

| <p><b>Concerned Party:</b> Rodney Martin</p> <p><b>Concern Info:</b> CP states:<br/>For several months to even years this has been somewhat of an issue for the area. Shawn (unsure last name) has been letting people bring old tires onto the property to stack for a fence. This fence began about 6 months ago, tires are lined up, sometimes they have fallen into others properties. There has been burning on this property, believing it is insulation and some type of wiring even. Could be burning of some of these tires as well. There is a string lined around the church property to try to keep the lines marked. They had a building burnt next to the church that had caused damage and worried more damage will occur. The stacked tires along with all the others people coming in and out to drop off trash (unwanted items to dispose) has the area neighbors very concerned for environment and well as damages to the area properties. [sic]</p> <p><b>Conclusions:</b> On April 3, 2026, Lyndsey Rightnower an Environmental Specialist with the Missouri Department of Natural Resources' Southeast Regional Office and I arrived at 14 Highway 49 in Cherryville. We were greeted by Shawn Stout. I explained the meaning of the visit and the nature of the concern submitted to the department. I provided Shawn with a copy of "Facts on Open Burning Under Missouri Regulations -PUB2047," "Management of Scrap Tires - PUB2056," "Managing Construction and Demolition Waste -PUB2045," "Illegal Disposal of Construction and Demolition Wastes- PUB2251," and an "Application for Scrap Tire Beneficial Use Approval MO 780-2042."<br/>Shawn stated that he has had other individuals living on his property who have recently been removed from the property. Shawn stated now that he is the sole occupant of the property he will be able to control and clean the property. There were around 35-40 tires on site at the time of the investigation. These tires were piled in the back corner of the property. Shawn stated that he had a contact in Steelville, Missouri. I informed Shawn that this person would need to be a licensed tire hauler to take these tires for him for profit. I provided Shawn with Josh Wilkerson's number, who is the Land and Air Section Chief with the Missouri Department of Natural Resources' Southeast Regional Office. Shawn stated he did not have a cell phone at the time but would contact Josh when he gets a phone. I thanked Shawn and we encouraged him to stay in touch if he had any questions and we left the property.<br/>On April 6, 2026, I attempted to speak with the party concerned. I left a voicemail requesting a call back for more information on the situation.</p> |               |                    |                                 |                 |                       |        |                    |                    |

| <p><b>Concerned Party:</b> John Fort</p> <p><b>Concern Info:</b> CP States; Calling about the smell in Haywood City. It is so strong. The community is having to deal with the terrible smell constantly. It is so strong I don't want to go outside. CP is concerned about health effects and if it is safe to be outside around the smell. When folks come from out of town to visit the church or schools they can't stand the smell and don't want to come back to the town. Worried about the kids at the school who are outside playing around the constant odor. CP would like to know if it is safe or if it poses a health risk? [sic]</p> <p><b>Conclusions:</b> On March 26, 2026, I conducted odor monitoring, while accompanied by Environmental Specialist Tiffany Terrell. Refer to the two odor monitoring data sheets for details.<br/>On March 27, 2026, Environmental Supervisor Jesse Evans conducted odor monitoring. Refer to the odor monitoring data sheet for details.<br/>On March 27, 2026, I left a voicemail for the concerned party. No response was received.<br/>On March 27, 2026, I contacted Jeff Limbaugh with Heartland Applications. I advised him of the concerns the department had received in the last two days. Mr. Limbaugh advised he had received complaints as well, and prior. Mr. Limbaugh advised conversations with the Scott County Central High School Superintendent, in attempt to limit efforts that could lead to odors during events at the school (referencing a schedule). Mr. Limbaugh stated that he intends to raise corn crops on his property where application is applied and stored for transporting. Mr. Limbaugh referenced providing the material for application to adjacent properties, not solely his own.<br/>On April 7, 2026, Jesse Evans performed additional odor monitoring and discussed site conditions with Jeff Limbaugh. Refer to the odor monitoring data sheet for details.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |               |                    |                                 |                 |                       |        |                    |                    |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County             | Region | Inspector Initials | Final Action |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP states:<br/>The neighbor has been stock piling trash and burning mattresses, alum. cans and all sorts of debris. The wind blows a lot of the left over into the neighboring properties. Trampoline has no net and doesn't seem to be anchored, it blows everywhere as well. Unsure of all the contents of the trash he burns but he is not covering anything and all the debris is constantly polluting the air and yards nearby. This has been happening for several months. They do have a dumpster that is overflowing but hasn't been picked for a while. We just really would like someone to help us they can. [sic]</p> <p><b>Conclusions:</b> Upon receiving the concern, Hayden Cassinger, Environmental Specialist, visited the property on March 30, 2026. At the time of the visit, no one was present on the property. A burn pile could be observed but appeared to mainly consist of residential waste. Some trash was observed near the road, next to a dumpster. It appeared the waste had been placed there for a waste pickup.</p>                                                                                                                                                                                                                                                    |               |                    |                                 |                 |                         |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> MSC 4/2/2026: CP wishes to remain anonymous; however, they wanted to supply their email. I explained sunshine requests, the CP still wished to provide the email address. The CP states they have photos and videos they would like to share with the investigator. The SoC is 121 Pleasant View Dr, Foley, MO 63347 the burning occurred yesterday and was stated to contain mattresses, plastic, and household trash. I explained a mattress would be considered a durable good and therefore out regulations prohibit that burning. I explained that the burning of household trash generated on property is not prohibited under our regulations. The burn pile is located in the back of the property behind the house. There are no patterns to the burning, it was stated that a pile is formed until it is large enough and then lit usually the size of 1-2 truck beds. No police or fire departments are known to have responded. The SoC were stated to be the property owners, Jodi and Joesph Grimstaff. [sic]</p> <p><b>Conclusions:</b> No violations of open burning were identified during the investigation.</p> <p>The SoC has been sent a compliance assistance letter and a fact sheet on open burning.</p> <p>The CP has been sent an e-mail outlining initial department action.</p> |               |                    |                                 |                 |                         |        |                    |              |

| <p><b>Concerned Party:</b> Russell Valleroy</p> <p><b>Concern Info:</b> We received an open burning concern from the DNR website. The CP states: We have a neighbor in the subdivision with a trash pile with household items, large furniture, plastic drums, metal fencing, and etc with intent to burn. They were given 30 days to remove non burnable items, but have failed to comply with HOA indentures. [sic]</p> <p><b>Conclusions:</b> A letter is being mailed to the facility with information on disposal of solid waste and open burning regulations.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |               |                    |                                 |                 |                         |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP stated that the SoC is burning waste that is in black trash bags. CP doesn't not believe that it is residential waste. He said that he believes that it could be some sort of plastic/rubber because of the smell. He stated that this is the 3rd day in a row that they SoC has been burning, and that the SoC has 7-8 trash bags ready to burn later today. He also doesn't believe that whatever they are burning isn't coming from the residence and is being brought in from somewhere else. He has already talked to the fire department. CP gave two properties that both are burning and they are related to each other.</p> <p>3135 Upper Moss Hollow, Barnhart, MO 63012<br/>2982 Upper Moss Hollow, Barnhart, MO 63012</p> <p>*CP stated that there is an open drug investigation (meth) regarding the people living at these properties* I let him know that if an investigator goes out the site and deems it as a meth lab, the concern will be referred to someone else</p> <p>A water concern was also placed regarding the property at 3135 Upper Moss Hollow Rd. [sic]</p> <p><b>Conclusions:</b> An investigation was conducted and no violations were noted at the time of the investigation.</p> |               |                    |                                 |                                        |                        |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP states:<br/>Deuce Truck Shop has been collecting trash from all over the area, they are allowing people to pay for them to dispose of it. They burn this trash all over the truck shop property. This has been an ongoing issue for several years. CP stated that large trucks dump loads daily if not daily at least couple times a week. Smoke that fills the air causes the neighborhood residents to cough and have severe allergies. Unsure what all they are burning, not sure if they are allowing unsafe materials to be disposed. The type of business this seems to be might allow some things that should not be to be burned. This is located 800 yards from the rural water tower. [sic]</p> <p><b>Conclusions:</b> During the investigation, I observed improper disposal of solid waste and open burning violations. The property owner, Robert Threlkeld, is deceased; Patsy Threlkeld is listed on the property tax receipts and Lucas Threlkeld is active on the property. See the Letter of Warning issued to Lucas and Patsy Threlkeld on May 6, 2026, for details.</p>    |               |                    |                                 |                 |                          |        |                    |              |
| 66157                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 03/23/2026    | 03/23/2026         | Robert Thomas                   | Other           | Wyatt /Mississippi       | SERO   | LR                 | Letter       |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> Cp States: For the past week a house is being burning and demolishes. The smoke is very thick, not sure what all the contents are in the burning but was concerned for our health and safety. This has been a slow process so far. Not sure if they have permission to do this. [sic]</p> <p><b>Conclusions:</b> During the investigation of the property, owned by Florestine Tyler, Robert Thomas was found to be improperly disposing of construction and demolition wastes via open burning. See Letter of Warning issued to Robert Thomas and Florestine Tyler dated May 5, 2026, for details.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |               |                    |                                 |                 |                          |        |                    |              |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP States: There is a house being torn down across from the community center (Smith St) in Wilson City and they have plans to burn it. It will cause terrible smoke and it doesn't appear to have had any of the asbestos materials removed. CP believes the gentleman tearing it down is a contractor hired by a property owner, first name of Robert. There have been many houses torn down and burned throughout Wilson City and CP has reported issue previously. CP also mentioned there is construction debris being hauled into the property owned by Will Davis (corner of Smith St. &amp; East St, Next to New Haven Church of God) and being burned on the back of the property. [sic]</p> <p><b>Conclusions:</b> No violations were observed on the property owned by Will Davis.</p> <p>During the investigation of the second property, owned by Florestine Tyler, Robert Thomas was found to be improperly disposing of construction and demolition wastes via open burning. See Letter of Warning issued to Robert Thomas and Florestine Tyler dated May 5, 2026, for details.</p> |               |                    |                                 |                 |                          |        |                    |              |
| 66160                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 03/30/2026    | 04/06/2026         | Caleb Roseman                   | Other           | Kewanee /New Madrid      | SERO   | HC                 | Letter       |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP states:<br/>For the past 2 weeks Caleb Roseman has been demo and burning mobile homes. He has already burnt 2 trailers- causing insulation to blow all over the neighboring properties. The CP has breathing issues and this has severely worsened since this began. the insulation is flying in the air and worried the fiberglass is in their homes. The Responsible party has plans to burn up to 20 trailers on the spot he is already doing this at. He has burned copper wiring as well as other materials. CP is unsure what all the mobile homes contained but has saw the insulation and wiring for sure. Other neighbors are considered for there air quality as well. [sic]</p> <p><b>Conclusions:</b> Caleb Roseman was found to be in violation of open burning and improper disposal of solid waste. For full details, please refer to Letter of Warning issued to Caleb Roseman on April 28, 2026.</p>                                                                                                                                                                          |               |                    |                                 |                 |                          |        |                    |              |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County           | Region | Inspector Initials | Final Action |

| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP states:<br/>Ongoing issues-2 trailers being burned, not sure of all contents. Copper wiring (enough to weigh a truck bed down) burning several times a week. The smoke and debris pieces are so bad it ends up on the neighbors belongings. Choking nearby if you are outside. CP believes they were fined by EPA in the past but not sure of the details. Insulation burning/fiber glass covering the grounds. They were seen stopping up and digging up the ditch/waterway nearby removing something of a green substance, burning this down to make a gold like material? There is a tin covering over the area near a pipe (North) Birds have used this insulation to make nests as well as all the random debris all over the grounds. They are running a sewage line on top of the ground freely into the ditch. CP would like to remain anonymous at this time. [sic]</p> <p><b>Conclusions:</b> Caleb Roseman was found to be in violation of open burning and improper disposal of solid waste. For full details, please refer to Letter of Warning issued to Caleb Roseman on April 28, 2026.</p>                                                             |               |                    |                                 |                 |                       |        |                    |              |

| <p><b>Concerned Party:</b> Russell Valleroy</p> <p><b>Concern Info:</b> CP states: We have a neighbor in the subdivision with a trash pile with household items, large furniture, plastic drums, metal fencing, and etc. with intent to burn. They were given 30 days to remove non burnable items, but have failed to comply with HOA indentures. [sic]</p> <p><b>Conclusions:</b> A letter is being mailed to the facility with information on disposal of solid waste and open burning regulations.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |               |                    |                                 |                 |                       |        |                    |              |
| 66186                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 04/13/2026    | 04/13/2026         | Unknown                         | Other           | Richwoods /Washington | SERO   | JE                 | Memo         |
| <p><b>Concerned Party:</b> Anonymous</p> <p><b>Concern Info:</b> CP states:<br/>Chemical spraying by jet aircraft eventually blocks out sunlight by grid patterns across the sky. This is not just visible to the Richwoods area... It continues to happen regularly all over the USA.<br/><a href="http://www.GeoengineeringWatch.org">http://www.GeoengineeringWatch.org</a><br/>Also, why are there no air monitoring device located near the huge Timber Ridge landfill that has been constructed in the Richwoods area?<br/>Also, please correct the spelling of Richwoods (not Rich Woods) in the Washington County selection list in your reporting program so these issues can be correctly logged. [sic]</p> <p><b>Conclusions:</b> Missouri Department of Natural Resources (MoDNR) does not regulate mobile emissions which would include planes. For emissions from planes, one would contact EPA Region 7 at 913-551-7003 and Federal Aviation Administration at 866-835-5322.<br/>Timber Ridge Landfill has a facility ID of 221-0031 and is a Title V facility for air emissions. They undergo regular inspections by MoDNR based on their Operating Permit OP2018-014. Their last inspection occurred on June 20, 2025.</p> |               |                    |                                 |                 |                       |        |                    |              |

| Concern No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Received Date | Investigation Date | Suspected Source Owner/Operator | Concern Type(s) | City/County       | Region | Inspector Initials | Final Action       |

| 66200                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 04/06/2026    | 04/30/2026         | Todd Moore                      | Other           | Perryville /Perry | SERO   | JW                 | Phone Conversation |
| <p><b>Concerned Party:</b> Perry County Commissioner Jay Wengart</p> <p><b>Concern Info:</b> Perry County Commissioner Jay Wengart advised he had received concerns from the public regarding the staging of large amounts of wood waste from apparent tree trimming operations. Concerns regarding the staging of the pile adjacent to a propane tank on a neighboring property of a church. Additional safety concerns for open burning have been noted. [sic]</p> <p><b>Conclusions:</b> On April 30, 2026, I attempted a phone call to the owner, John Glennon Moore, listed on the department's parcel viewer webpage via a phone number located on the internet (573-547-4063). I left a voicemail.<br/> On May 1, 2026, I left a voicemail for Southern Landscape Services, Todd Moore (573-547-5510). This was based off historical department records (Notice of Violations issued on November 3, 2014) issued to both Todd and Glennon Moore, respective to the property. The Notice of Violations were issued due to open burning of wood waste brought to the property via the landscaping business. I left an additional voicemail for John Moore.<br/> On May 5, 2026, I left a voicemail for both parties again. Todd returned my call and we discussed the concern received. We discussed the historical NOV's issued by the department. He advised that he is only bringing vegetative wood debris (no solid waste) back to this property and is not burning it. He stated the current amount is an accumulation over approximately 15 years.<br/> The property owner is his dad, John "Glennon" Moore. He referenced plans for a wood chipper (1+year), but money is tight and efforts have been limited. I advised him that he should consider staging some distance between his wood waste and the propane tank on the church property, to which he agreed. I also encouraged to identify another piece of property (his own or a business partner) that would meet the open burning distance requirements to allow for disposal of the wood waste. He advised he would check into it.<br/> I also advised him for his awareness my discussion with the County Commissioner would be to discuss with the local fire department, if there are any safety concerns from their side. I discussed that currently based off reports, that no regulatory concerns currently exist from the staging of the wood waste. However, should new information, safety concerns, or nuisance concerns arise, that this could impact consideration.<br/> Todd stated his father is elderly, and referenced he had received a phone call. I advised Todd to forward on our discussion with his father or awareness, as he is the property owner. I also told Todd that a department team member would be visiting the property for photographs.<br/> On May 6, 2026, Environmental Specialist Hayden Cassinger visited the respective site and took photos (see attachment). A large amount of vegetative wood waste was staged on the property with no signs of open burning. The debris on the property was immediately adjacent to a propane tank and other utilities (utility poles).<br/> On May 7, 2026, I discussed the site with Todd Moore. I encouraged him that the vegetative wood waste should be staged back from the propane tank, any structures, and/or utilities for safety considerations and/or provide accessibility. He advised that he would create a distance between the wood waste and these locations. I advised him that a local fire district or utilities provider may have further requirements on the distance requirements, and that he may be contacted regarding this as I would be encouraging Commissioner Wengart to discuss his concerns with the local fire district.<br/> Based off discussion and investigation, no open burning actions had occurred or are planned. It was recommended to identify a disposal route (open burning/wood chipping) for the wood waste, that meet regulations accordingly. Options could include identifying a separate property (or an agreement with another property owner) for a location that could meet open burning regulations. It was advised should continued concerns be received, the department will investigate accordingly based off the information provided and evaluate.<br/> An email was sent advising recommendations and regulations (see attached). I contacted Commissioner Wengart for awareness of discussions. He advised plans to contact a local fire district for discussion and potential investigation of the staging of the wood debris.</p> |               |                    |                                 |                 |                   |        |                    |                    |
